

Experience Trondheim *– In a way you've never done before*

A Canal Safari can start at our office at Kai 19 or another agreed place in Trondheim. We will greet when we meet and go through the trip and our routines of the tour.

The trip includes elements of both the old and new cityscape, which makes the trip quite unique. From a new perspective, you will see elements such as the fish market at Ravnkloa, via "The Sunny Side" to the Old Town Bridge, where you also will get a glimpse of the Nidaros Cathedral.

"One can only imagine what a lively life it must have been here a couple of hundred years ago."

You can decide the duration of your experience yourself! We will happily expand your Canal Safari as we know a lot of places in Trondheim, for instance The Monk's Island and Grilstad Marina amongst others.

There is always an opportunity for something interesting on board – both for your brain and palate. We will agree on this in forehand to assure that you have the best experience of the city as possible.

We will equip you with floating suits, goggles, gloves and beanies. What you need yourself is footwear to use at sea and a warm sweater if the weather is cold.
