

**Insights from 2nd International Conference on Modern Research in Social Sciences
(ICMRSS), Milan, Italy, 30 October – 1 November, 2019.**

Govinda Prasad Devkota, Tribhuvan University (TU), Nepal

Venue

Collegio di Milano-Via, San Vigilio 10-Milano, Italy

Number of Attendees

197 attendees registered for the conference

Overview

Over the three days of October 30- November 01 2019, the ICMRSS was held in Milan Italy for sharing research experiences among researchers and educational activists The ICMRSS combined expert and research students' short presentations in the form of Oral presentation, poster presentation, Key notes and panel discussion on the sanitation and health related emerging issues. The objective of this conference was twofold:

1. To have insightful presentations, engaging discussions, vibrant networking with leading academics;
2. To provide perfect platform for sharing their research experiences of academic researchers.

Conference Format

The three-day conference comprised 8 plenary sessions, with 2-3 speakers per session. Each speaker was given 15 minutes to present, followed by 5-10 minutes for questions. The conference was structured to foster discussion between participants around the core themes. Each day of the conference also allotted one hour for lunch, and 30 minutes for morning and afternoon tea to allow participants to continue their discussions after each session. Time was allocated at the end of each day for a group reflection on the day's discussions.

Policy Briefs

Each speaker was required to submit a policy brief based upon their conference presentation topic, prior to the event. Where possible, policy briefs were made available online for conference participants prior to the event. Hard copies of the policy briefs were also made available to participants during the conference.

Social Programme

City tour for 6 hours in and around Milan city (DUOMO, NAVIGLI, BRERA, ISOLA) was very interesting. The historical place Milano, Italy is really one of the best place that I see in my life. City planning, cleanliness, protection of cultural heritage, Church, Monument, statue are also matter of heart touching.

Issue of my presentation

I have presented ground reality of Ecological sanitation (Eco-san)/ Urine Diversion Dry (UDD) Toilet of school setting in Nepal. As I found in my study that the use of Eco-san toilet/UDDT and application of human urine resulted Eco-san is a systemic approach which is the best solution of environmental sanitation solution and also the rich sources of Nitrogen (N), Phosphorus (P) and Potassium (K). So, use of Eco-san/UDDT and application of Human excreta

as manure is the best solution of environmental sanitation and nutrient recovery. Finally, It's my pleasure to have an opportunity to present my paper in 2nd International Conference on Modern Research in Social Sciences (ICMRSS) , Milan, Italy, 30 October-1 November, 2019. My special Thanks go to the conference organizing committee who was provided me platform for sharing my research findings. I have also thought about processes of working groups reporting back to plenary session and key notes. No matter how slick the drawings, or how details the notes, or how passionate the speaker, it seems that reporting. Moreover, I would also like thank you Norwegian Research School of Global Health (NRS GH) for providing me

funds/ international grants to attend the conference.

Thank you.
