How can NTNU Alumni Contribute to NTNU's European Activities?

Massimo Busuoli

NTNU Brussels Office

Discussion points:

- Alumni chapters can be...
 - Sources for partnerships for EU projects?
 - Sources for possible industrial collaborations/agreements?
 - Partners in specific initiatives/projects with Dissemination Role?
 - Providers of internship opportunities for NTNU students?

Example 2: contribute to provide partners

- NTNU is engaged in three KICs of the EIT. These KICs launch calls for pilot projects for technology transfer actions. Here industries are key.
 - Alumni Chapters could contribute to establish dialogue with relevant companies as possible partners in these projects.
-
- NTNU is establishing a Digital Innovation Hub to be part of a European Network of similar Hubs
 - Again Pilot actions for Transfer of Digital Technology to industries will be of relevance and link with interested industries will be key for the Hub success

Discussion
