Cooperation with India:
Erasmus+ global mobility and Erasmus+ capacity building

NTNU participates in the Erasmus+ programme which is EU’s programme for Education, Training, Youth and Sport.

The Erasmus+ programme opens for educational cooperation between Norwegian institutions and Indian institutions.

The two possibilities offered are:

1. **Erasmus+ global mobility:**
   Erasmus+ Global Mobility refers to the mobility of students and staff between European higher educational institutions and non-European partner countries.
   There is an annual call for applications.
   NTNU applies as the coordinating institution.
   The Office of International Relations at NTNU coordinates the application on behalf of NTNU’s departments.
   Approved projects receive funding for the mobility of students and staff.

2. **Erasmus+ capacity building:**
   Projects aimed at raising the quality of higher education in partner countries outside the EU.
   These projects must focus on capacity building, either at the institutional level or at the system level.
