## EuroShop

The World's No. 1 Retail Trade Fair

### 5 – 9 March 2017

Düsseldorf • Germany

#### Meeting at the EuroShop 2017 retail fair

MultiPACK participated in the retail fair [EuroShop](#) on 5-9 March 2017. The booth rented by DANFOSS was also used as meeting point for the project's partners and as the place where attendees could ask for information about MultiPACK.

Part of the time was devoted to discussions about the supermarket installations.

#### First training event in Porto, Portugal

ENEX and CNR ran a training session in Porto, Portugal, on 6-7 April 2017. The objective was to provide SISTAVAC (now RACE) with information about commercial refrigeration with CO<sub>2</sub> technology, design and control aspects for supermarket installations, and a presentation of the already installed CO<sub>2</sub> systems. Manufacturers of evaporators (Centauro) and cabinets (Jordao) were also present to understand how their products would cope with CO<sub>2</sub> technologies.

The event has been considered a success by all parts. The consortium aims at conducting more such trainings and involving more participants.

#### Conference on Ammonia and CO<sub>2</sub> Refrigeration Technologies in Ohrid, Republic of Macedonia

MultiPACK was present at the [Conference on Ammonia and CO<sub>2</sub> Refrigeration Technologies](#) in Ohrid, Republic of Macedonia, on 11-13 May 2017. The conference is a popular meeting point for all those interested in the state of the art and possible developments related to these technologies. MultiPACK had the chance to spread the word and let more people, especially research scientists, know about the project.

#### Presentation at the XVII European Conference on the latest technologies in refrigeration and air conditioning

MultiPACK had a presentation at the [conference in Milano](#) on 9-10 June 2017. The objective was to introduce the project's intentions and methods, highlighting the benefits obtainable by using integrated cooling and heating systems based on CO<sub>2</sub> in warm climates, especially in Southern Europe.

#### Publicity on the Italian magazine Zerosottozero

MultiPACK has submitted a short article, in Italian, to the magazine [Zerosottozero](#), hoping to reach out for more potential candidates to the field test campaign. An abstract of the article is already on their website at this address, whereas the full article will appear in the October 2017 issue of the magazine.

## RACE

Refrigeration & Air Conditioning Engineering

#### SISTAVAC has changed name to RACE

One of MultiPACK's Portuguese partners, SISTAVAC, has changed name: it is now known as RACE (refrigeration & air conditioning engineering).

#### The supermarkets for the experiments have been selected

The three supermarkets in Portugal where MultiPACK will conduct its experiments have been selected. One in particular, located in Lisbon and scheduled to open in November 2017, is ready for the commissioning of the project's integrated system. The other two will open at a later time, and the commissioning will be scheduled accordingly.

#### Demonstration sites

**If you own a hotel, gym, spa or other similar large, high energy-demanding building in Southern Europe and the energy systems are out of date with a high environmental impact, then you are a potential candidate in the MultiPACK demonstration sites selection process.**

The advanced energy efficient MultiPACK package will be installed at no additional cost (the baseline system has to be purchased, additional funding for project design consultancy is available), tuned to meet the needs of the specific site, and continuously monitored. You will experience first-hand the advantages of the system, as it allows to save more than 25% of the energy and money with respect to current technologies.
