E-newsletter #3, December 2017

Change of supermarkets for the experiments

Owing to financial reasons, the three supermarkets where MultiPACK will conduct its experiments will not be all in Portugal any more. Only one will still be in Portugal, namely in Lisbon, while the other two have been replaced with alternatives from the centre and south of Italy, namely in Rome and Avellino. The MultiPACK unit for Rome is under commissioning, with data collection expected to start in January 2018; the unit for Avellino is expected to be commissioned around February 2018; the supermarket in Lisbon has its opening scheduled for early summer 2018, with the MultiPACK unit to be commissioned shortly before that.

13TH IIR GUSTAV LORENTZEN CONFERENCE ON NATURAL REFRIGERANTS

Natural refrigerant solutions for warm climate countries

June 2018, 18th to 20th

Valencia – SPAIN

**INSTITUT INTERNATIONAL
DU FROID**

Organisation intergouvernementale
pour le développement du froid

**INTERNATIONAL INSTITUTE
OF REFRIGERATION**

Intergovernmental organization
for the development of refrigeration

Meet us at the Gustav Lorentzen Conference 2018 in Valencia!

The MultiPACK Consortium is attending the Gustav Lorentzen Conference 2018 on Natural Refrigerants, taking place on 18-20 June 2018 in Valencia, Spain. Some preliminary results from the experiments in supermarkets will be presented, plus it is an excellent chance to meet other people interested in developing environment-friendly technologies for refrigeration.

So do not hesitate and join us in Valencia next summer!

Demonstration sites

If you own a hotel, gym, spa or other similar large, high energy-demanding building in Southern Europe and the energy systems are out of date with a high environmental impact, then you are a potential candidate in the MultiPACK demonstration sites selection process.

The advanced energy efficient MultiPACK package will be installed at no additional cost (the baseline system has to be purchased, additional funding for project design consultancy is available), tuned to meet the needs of the specific site, and continuously monitored. You will experience first-hand the advantages of the system, as it allows to save more than 25% of the energy and money with respect to current technologies.
