

## ROCARC Webinar 2020

# Knowledge Exchange in Rock Anchoring

This is a call to a Webinar in rock anchoring on November 18, 2020. The Webinar aims to exchange the current knowledge in rock anchoring with focuses on the rock conditions in Nordic countries. The topic is the state of the art of rock anchoring, including theories, tests, engineering practice, concerns in the design, unsolved issues, etc. After the presentations, we'll have a discussion session to outline the commonly concerned issues. So far we have five presentations in the agenda with four confirmed and one to be confirmed. It is still a slot for 2-3 more presentations in the agenda. Let us know if you know somebody who can give a presentation in the Webinar.

**Time** (preliminary): 09:00 – 14:30, November 18, 2020 (Central European Time (UTC+01:00))

**Place:** Webinar via Teams (the link will be issued later)

**Language:** English or Norwegian
