# MONTHLY QUSPIN CAFES

All women who are interested in physics from bachelor to master level are welcome to our informal friendly cafes.

In the male-dominated field of physics our Center of Excellence, QuSpin, Center of Quantum Spintronics, wants to make a difference. We have attracted women from all around the world. Now we want to invite you to share your thoughts and ideas to better understand how we can attract even more women to our field of physics. Our female researchers will tell you a bit about what we do at QuSpin and career opportunities as a physicist. Light snacks and drinks will be served.

## FACILITATORS

Stefanie  
Brinkman  
PhD candidate

Johanne  
Tjernshaugen  
PhD candidate

Payel  
Chatterjee  
Postdoc

Sol H.  
Jacobsen  
Senior Researcher

Karen-Elisabeth  
Sødahl  
Center Coordinator

Program, place  
and registration

Norwegian  
Centre of  
Excellence
