Research impact

What are the end-users' needs, what is the potential research impact, the knowledge-gaps and the way ahead? At a [stakeholder workshop on June 8](#), organized by NTNU Digital, the Digital Transformation projects at NTNU meet industry and organizations to discuss and share knowledge.

[About the workshop](#)

A digital future - not for all?

Almost half the world's population is excluded from the digital future. [Join us in empowering them!](#) This is one of the topics last discussed in the resource network [Next Generation Internet in Norway](#) (NGINO), presented by Dr. Josef Noll from UiO.

Upcoming call for PhDs

The new EU-supported doctoral programme [PERSEUS](#) will start the recruitment of 40 PhD candidates who want to contribute to a smart, safe and sustainable future.

The first round of recruitments will take place during the autumn of 2021.

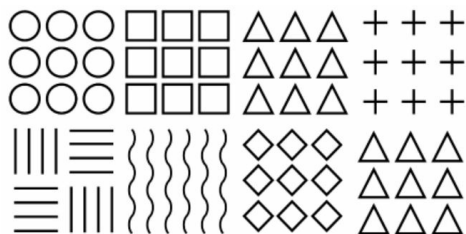

[About the recruitments](#)

Horizon Europe: Safe and secure AI

NTNU Digital is coordinating an ambitious proposal to be submitted for the call "European Network of AI Excellence Centres: Pillars of the European AI lighthouse" The proposal involves two strong research groups from NTNU, working together with about 40 partners from Norway and Europe.

About AI Excellence Centres

AI for good and bad

Digital Transformation: How much can you actually find out about people through their social media profile? Can organisations like the EU make citizens engaged online?

These are some of the topics investigated by the [Digital Transformation project "Trondheim Analytica."](#)
