

## **Open Application to Dexit**

Dear Ms. Carol

I am writing to enquire about any open positions in your company. As a newly graduated IT student, with a Bachelor's degree in IT-Operations and information Security, I am interested in any type of position that would allow me to contribute to your team with my high-level IT-skills. Please take some time to let me give you an introduction of myself and tell you why Dexit as a workplace appeals so much to me.

When I was twelve years old, I got a computer for my birthday. This was one of the best days of my life, and the technology behind a working machine has fascinated me ever since. From that time on, I have always amused myself with identifying IT errors and working hard on resolving them. Encouraged by this passion, it was easy to choose which study program I should go for upon entering university. I think my passion for machines and problem solving can be a great asset to your company.

The topic in my bachelor's thesis was network security at Cole University. This assignment gave me experience with the process of planning and conducting an independent project, including problem identification, analyzing and solving the problems in a methodological way.

During my studies, I had a volunteer position solving IT-related problems for my student organization, Berada. In this job, I utilized Azure and PGA solutions, as Dexit uses in its work. I also have experience with Cisco, CCNA and CCNP for data storage work, from my part-time job at EL-deals.

The first time I heard about Dexit was back in 2015 when you signed the "Future tech" contract with Talent Consulting Services. It would be fantastic to participate in such a strong collaboration. Nevertheless, my main interest in Dexit lies in the company's reputation for being a leader in "data storage and management services". Through researching your company, I have discovered that you work closely with a number of customers to handle their data centering needs through customized service agreements. This is something I would love to learn more about in the future. Dexit's reputation for high quality work and for being a preferred employer in this business, shows that Dexit as a company has a deep understanding of the needs of customers.

I really hope we can meet in person so I can introduce myself to you and discuss any relevant positions that may be available. I have attached my CV for your review, and I hope that I will hear from you soon. Thank you for your time.

Sincerely,

Kim Westerwood.
