

MEMS Tech

Sissel Jacobsen, Safran STN

Safran Sensing Technologies Norway (Safran STN) designs and manufactures high-precision tactical grade gyro sensors, gyro modules and IMUs for demanding applications. The company serves a global customer base in the Defense, Industrial, Aerospace and Commercial markets with solutions utilized in a wide range of applications.

STN operates its own wafer fabrication facility for production of the key sensor components in its products and provides MEMS Foundry Services with access to decades of experience and mature MEMS processes. This session will provide an insight into MEMS technology platforms and development including the latest research activities.
