We need to understand changes in water resources

Changes in water availability

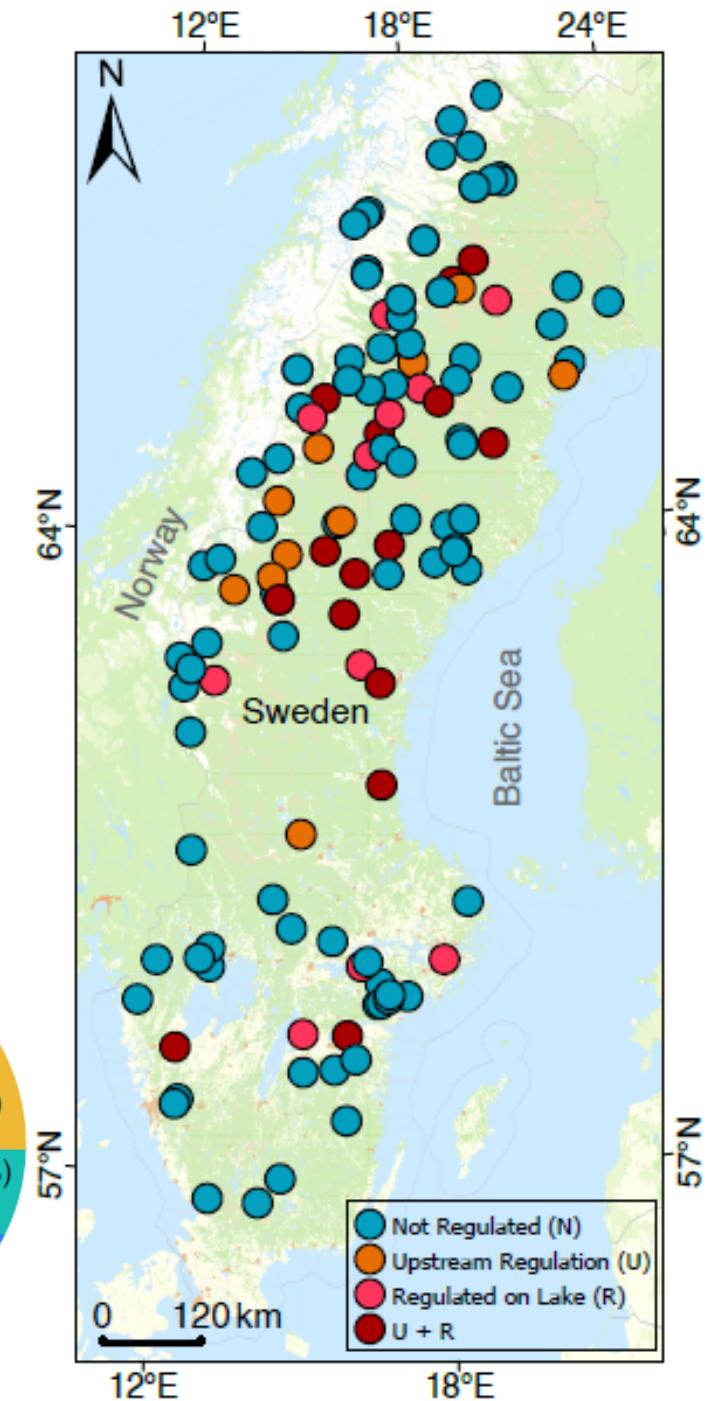

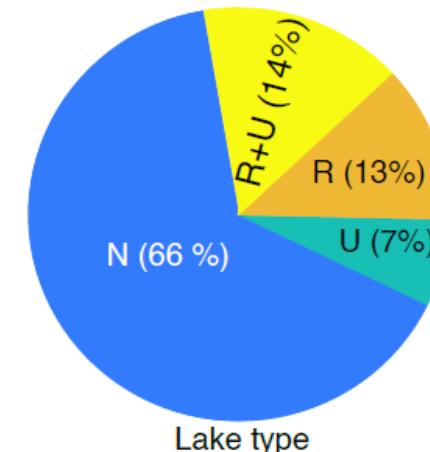

Research questions

1. How are water levels in Swedish lakes recently changing?
2. Is there any evident signal of regulation on these changes?

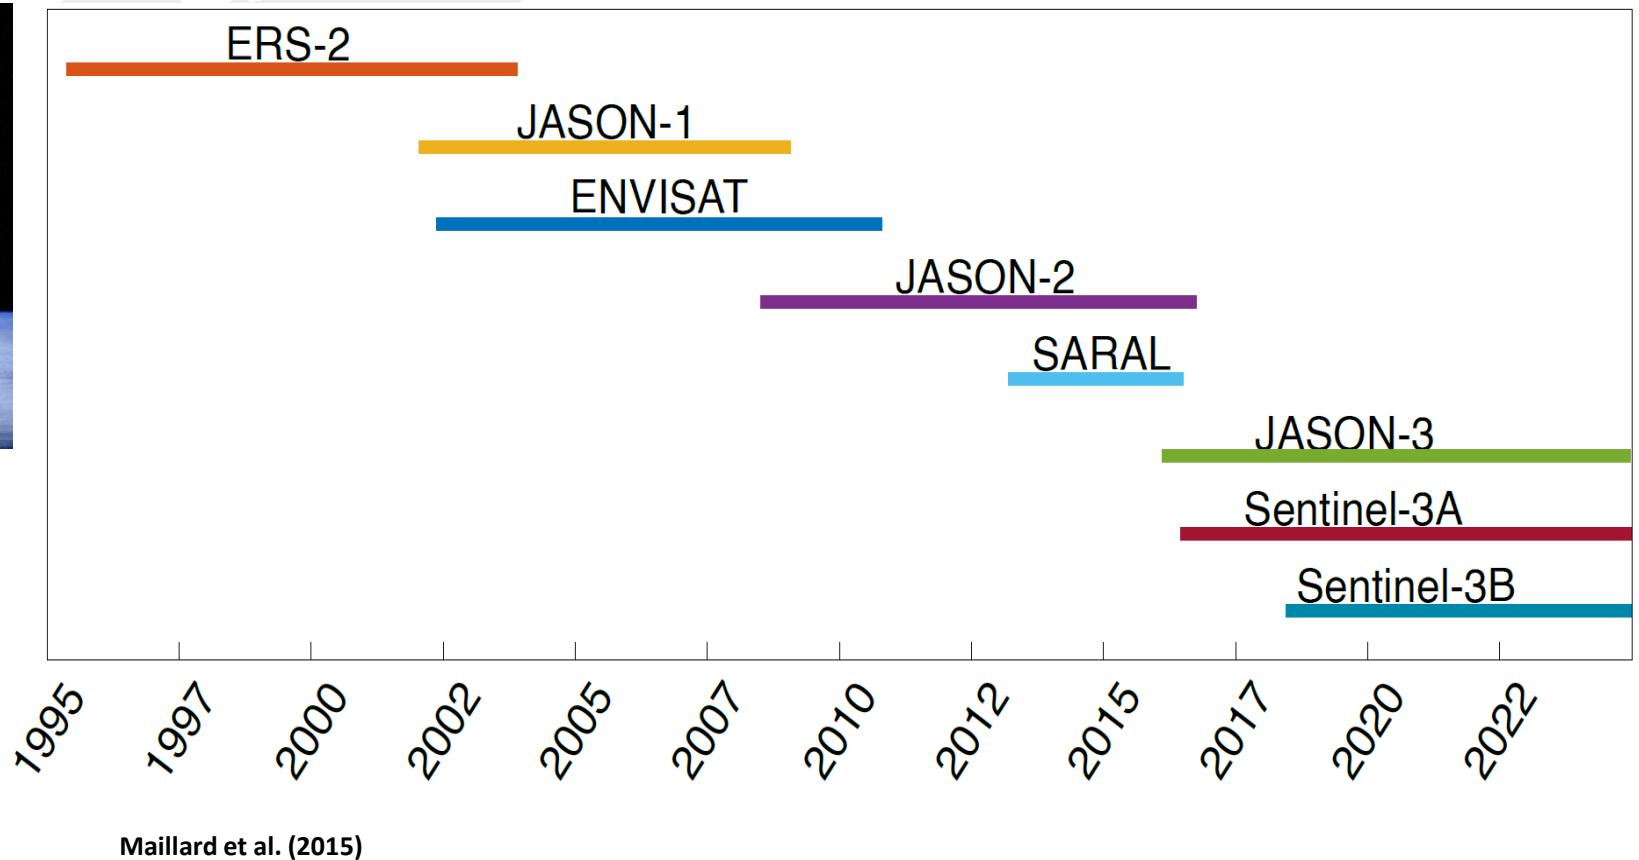

- 39 lakes monitored with gauges by SMHI
- ~150 lakes monitored from space

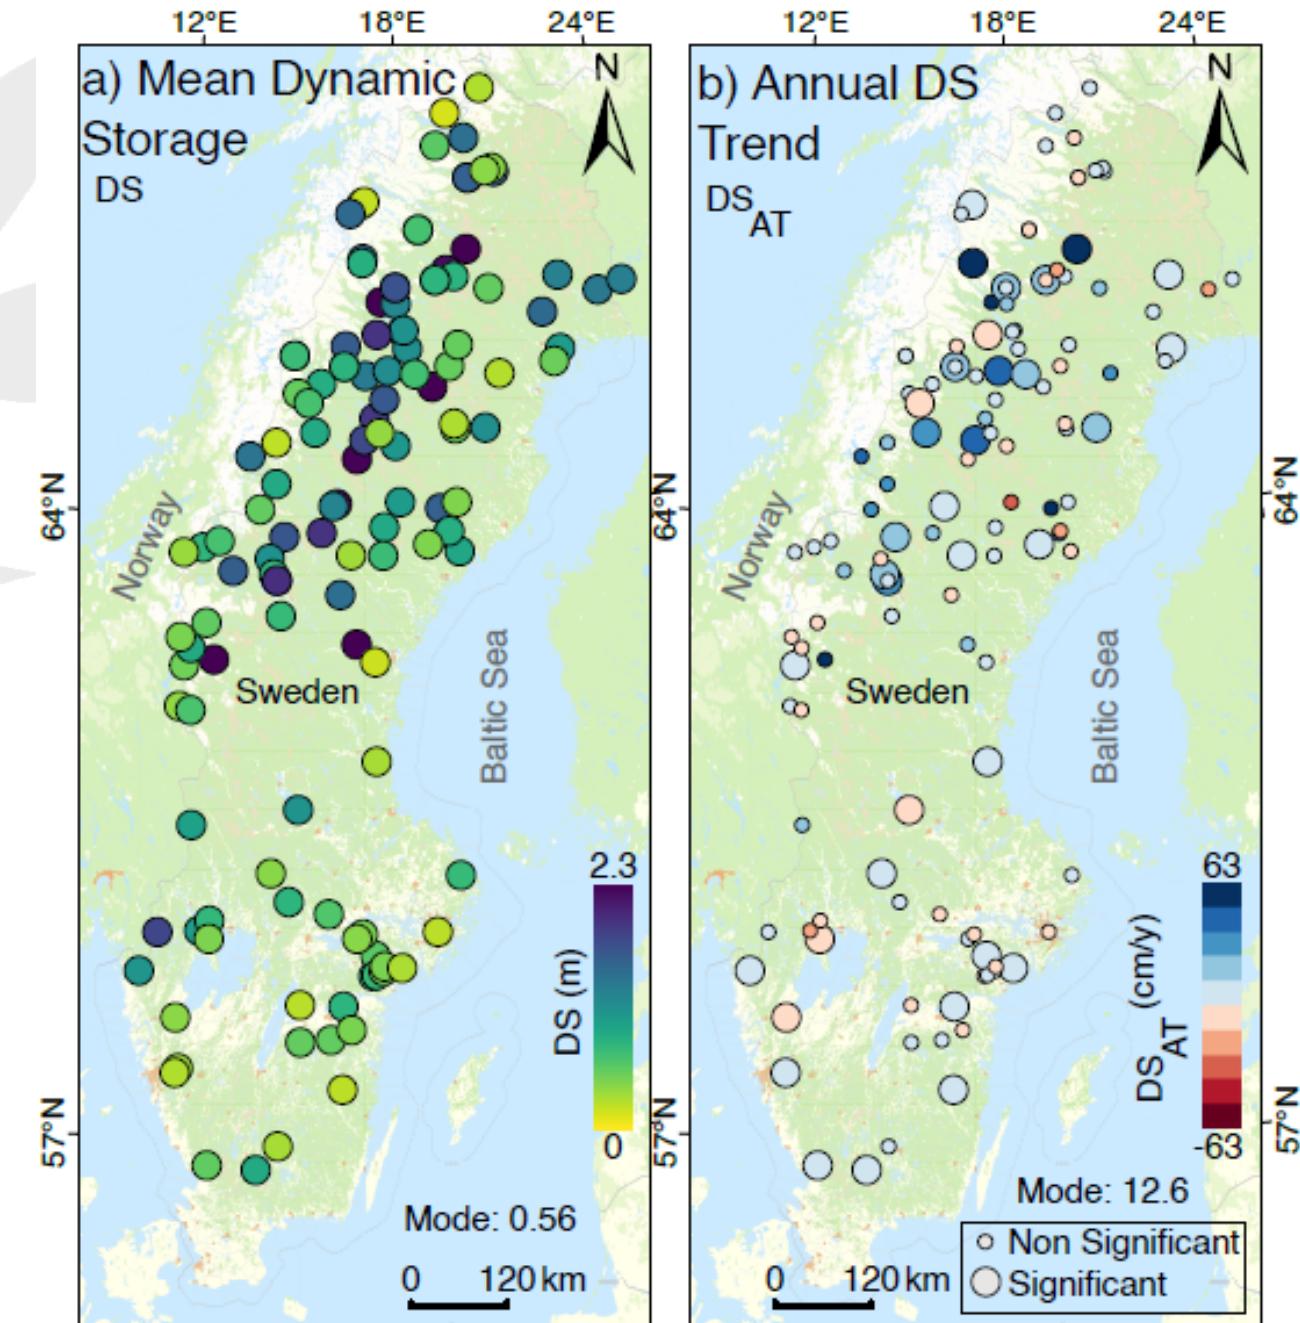

Water level can be monitored from space...

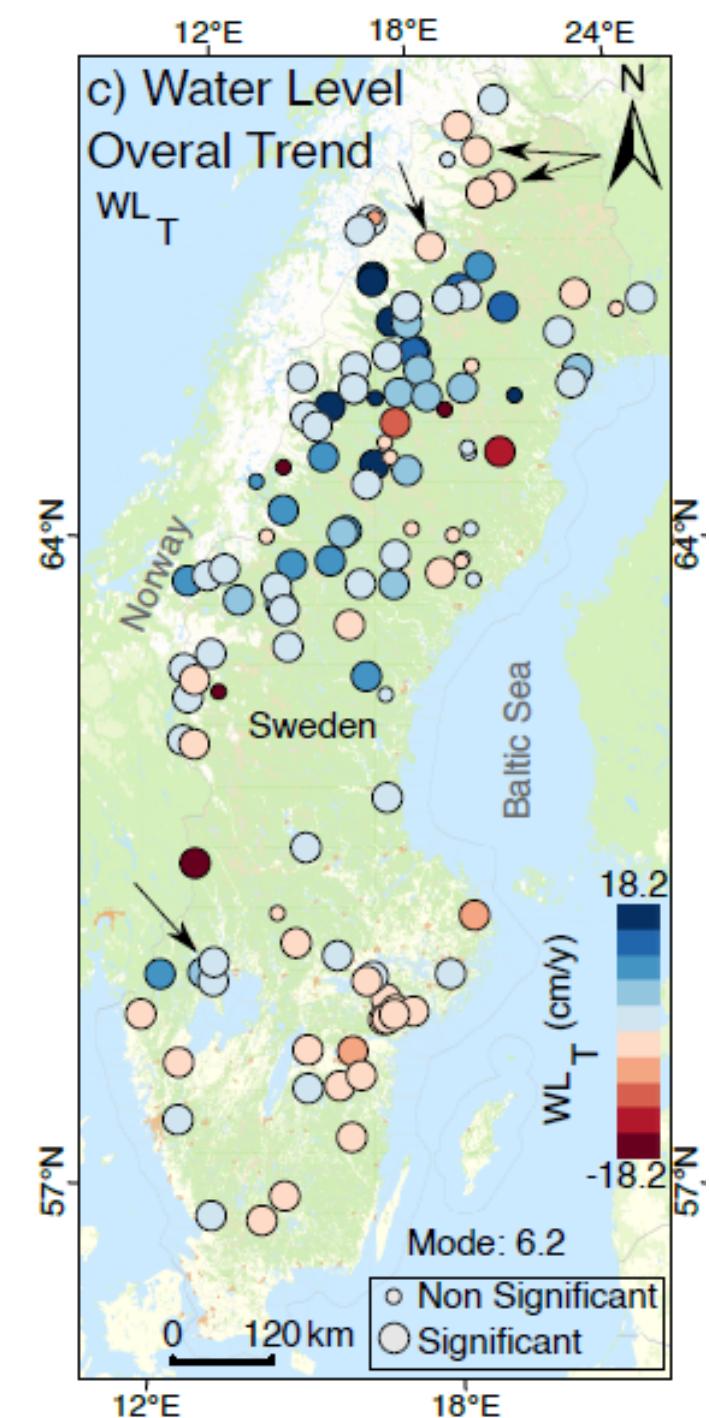

Dynamic Storage in lakes and reservoirs (2013-2022)

Water level trends (2013-2022)

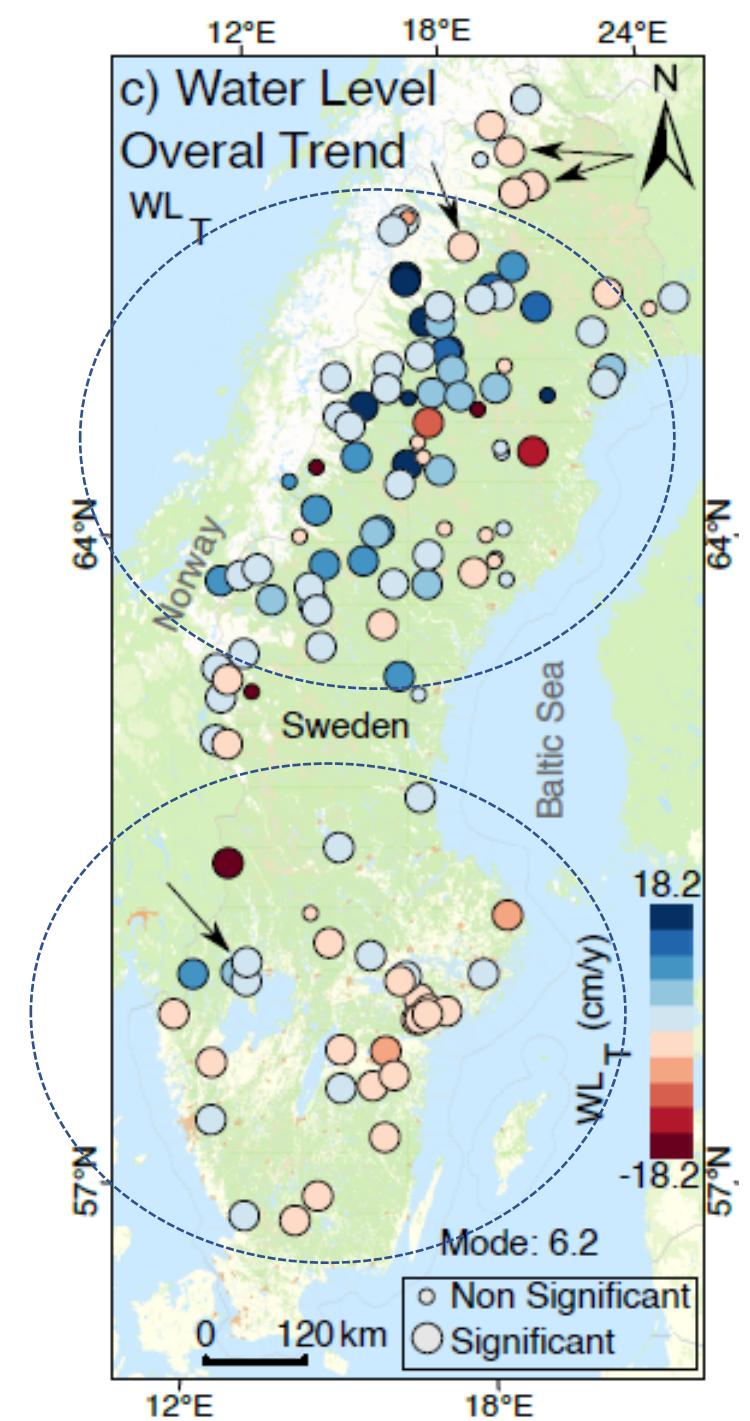

Water level trends (2013-2022)

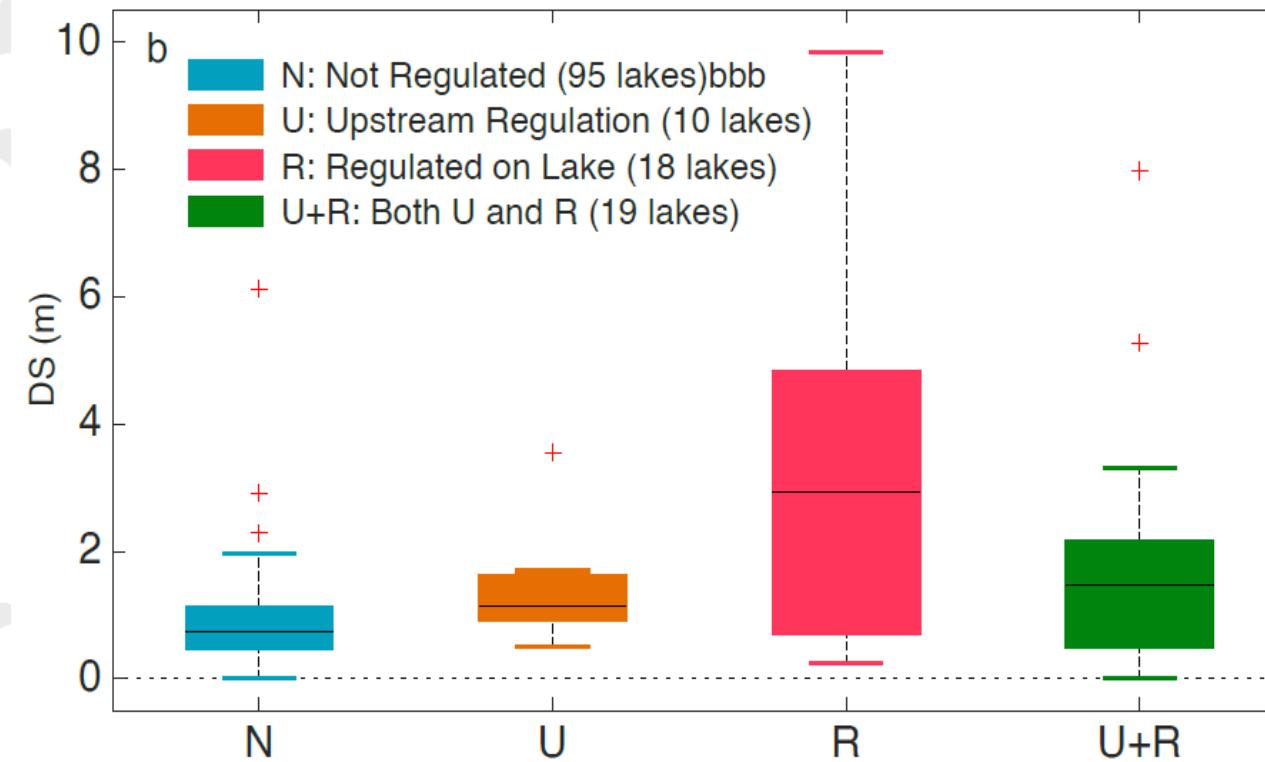

Increase

Decrease

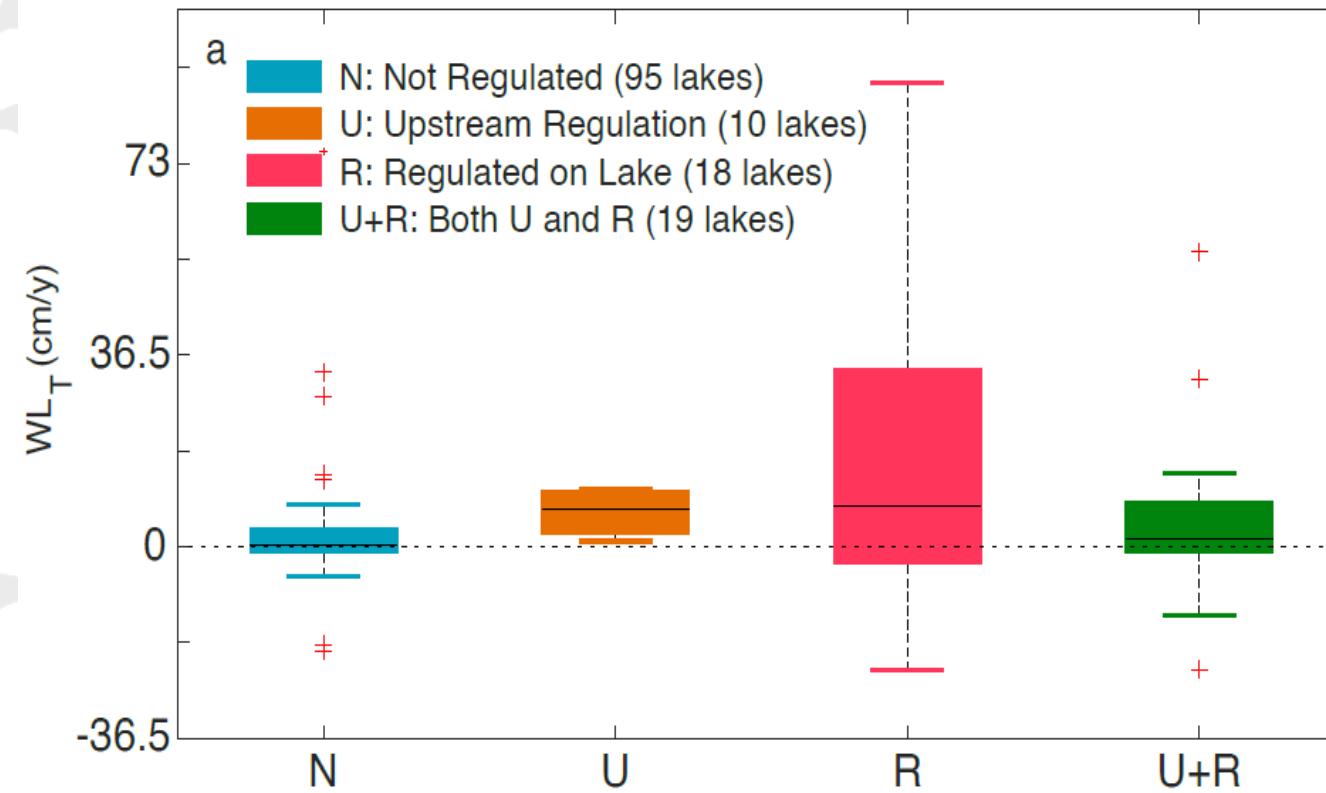

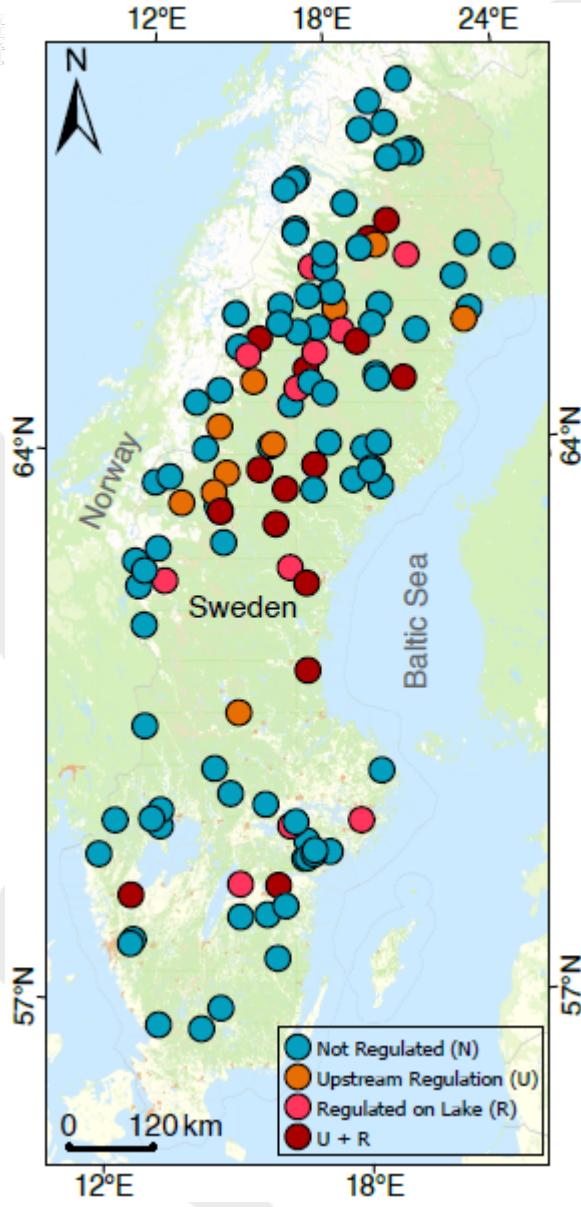

Dynamic Storage impacts of regulation 2013 - 2022

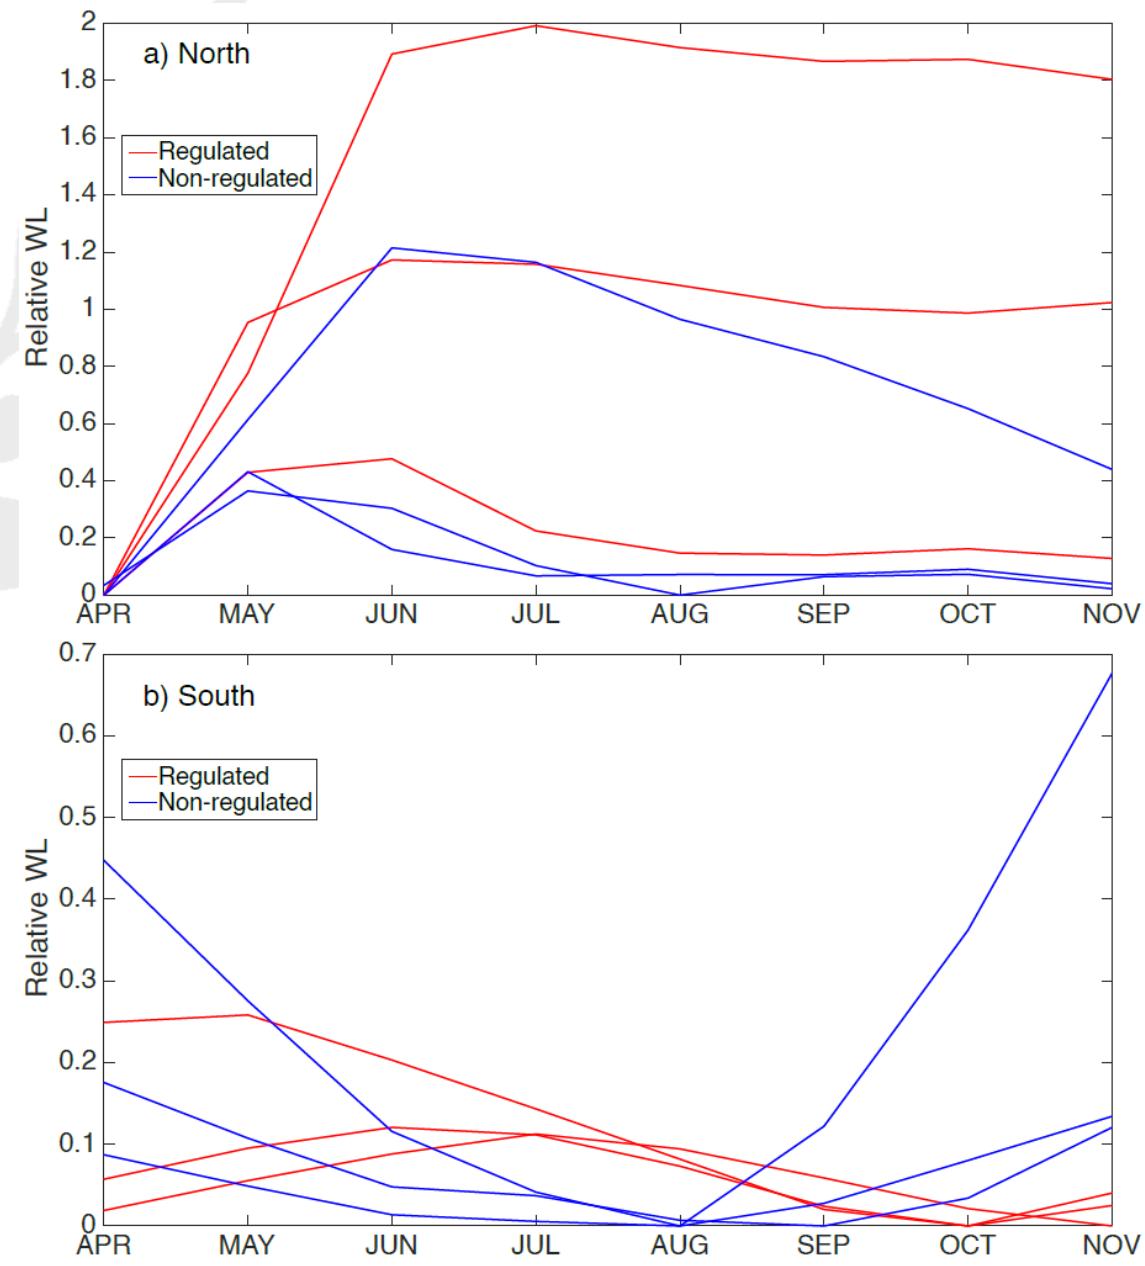

Water level trends in 150 lakes (2013 – 2022)

NORTH

SOUTH

Conclusions

1. The first country-scale study of changes in Swedish lake water levels
2. Successfully determined water level changes from space
3. Distinctive patterns of changes:
 - North-South and
 - Regulated-Not Regulated
