ECCM22 — MONDAY (08:00–19:00) — PRELIMINARY TECHNICAL PROGRAMME (version of 7 June 2026)
◆ = Italic = Short oral (7 min) · plain = Full oral (15 min) · · Minor changes to the programme may occur.

Time	Activity	A	B	C	D	Forum	M1	M2	M4	M5	Balder	Odin
08:00–08:25	**OPENING CEREMONY**											
08:25–09:10	**PLENARY 1**											
09:15–11:00	**SESSION 1**											
	Session →	**S510 - Understanding and improving longitudinal compressive strength**	**S515 - AI and Mechanics for Composite Design, Optimisation, and Digital Twins**	**S513 - Digital Twins and AI for Composite Manufacturing: Modelling, Monitoring and Control**	**4.7 Optical Fiber Sensors, 4.9 Thermography & 4.5 Non-destructive evaluation**	**S525 - Sustainable Composites Engineering: Innovations from a Doctoral Training Centre**	**5.23 Prepregs**	**5.13 Process Modelling and Simulation**	**S533 - Exploring challenges: from novel observations to paradigm shifting applications of composites**	**3.7 Failure Mechanics and Simulations**	**2.3 Matrix Materials: Polymers, Metals, Ceramics, Concrete, Geopolymers**	**5.6 Automated Placement Technologies**
09:15					**#1870** - Janice Dulieu-Barton (University of Bristol) Quasi-Optical Microstructured Optical Sensors for Monitoring the Manufacture and Performance of Composite Structures	**#236** - Erica Barnes (University of bristol) A Pathway to Circularity in Composite Manufacturing: Targeting High-Impact Consumables	**#1026** - Alexander Blumack (Institute of Materials Chemistry of University of Vienna) Pushing service temperature limits: Unidirectional carbon fibers reinforced polyamideimide composites	**#500** - Ioan Bîrgeaanu-Aucel (TU Delft) Towards model-based control for static ultrasonic welding of thermoplastic composites: identifying causal factors influencing weld machine displacement recordings	**#1383** - António Marques (IFEUP) EXPLORING THE CHALLENGES OF MANUFPLANTS AS A METHODOLOGY FOR BIO-COMPOSITES MANUFACTURING	**#804** - Xin Liu (The University of Tokyo) Machine Learning-Accelerated Cohesive Zone Model for Fracture Analysis of Composite Materials	**#427** - Jules Gardin (SAFRAN AIRCRAFT ENGINES) Thermo-chemo-mechanical characterization and modelling of a 3D interlock reinforced composite	**#741** - Julie Teuwen (Faculty of Aerospace Engineering, Delft University of Technology) Bond Strength of CF/TM-PADX Laminates Manufactured Using FlashTamp Automated Fiber Placement (FIAFP)
09:30				**#663** - Cristian Bules Cârdei (Advanced Composites Technologies, R&D Division, AIMEN Technology Centre) Process monitoring for a full-scale wing box using hybrid Fiber Optic Sensors in a One-Shot Liquid Resin Infusion process (LRI) - FLAMI-COMP "Flawless and sustainable production of composite parts through a human centred digital approach"	**#236** - Erica Barnes (University of bristol) A Pathway to Circularity in Composite Manufacturing: Targeting High-Impact Consumables	**#1221** - Priyanka Patel (University of Bristol (BCI)) Use of Wet Filament Winding Processes for the Manufacture of Non-Oxide Ceramic Matrix Composites	**#536** - Dennis Budelmann (Hamburg University of Technology, Institute of Polymers and Composites (IPC)) Processing characteristics of unidirectional prepregs with bio-derived polyfurfuryl alcohol) matrices	**#538** - Hyeon Dhilseui (Ecole des Mines de Saint-Etienne) Numerical Characterization of Flax Fiber Composite Variability: From Morphological Description to Fluid Flow Simulations	**#1456** - Durai Prabhakaran Ragh (Indian Institute of Technology, JAMMU) Lightweight Composite Transtibial Prosthetic System with EMG-Enabled Dynamic Movement	**#1054** - Rui Guo (Department of Materials Engineering, KU Leuven) High-fidelity micromechanical modelling of transverse tensile damage in cross-ply composites	**#631** - Mar Zuzzo Ruiz (FIDAMC, Foundation for Research, Development and Application of Composite Materials) Stamping and AFP for Next-Gen High-Rate Flaperon Manufacturing
09:45				**#1468** - Nan Tao (Department of Aerospace Structures and Materials, Delft University of Technology) Optical Fibre Sensor Placement for Composite Hydrogen Tanks	**#61** - Friel Ergin (Bristol Composites Institute (BCI), University of Bristol, University Walk, Bristol BS8 1TR, UK) Repeated Low-Velocity Impact and Quasi-Static Indentation at Various Temperatures		**#744** - Mulasaikuan Et-jak! (Delft University of Technology) Experimental analysis of tape manufacturing with melt impregnation	**#93** - Benjamin Haller (Airbus Helicopters) The Use of Manufacturing Process Simulation for the Industrialization of Composite Structures	**#1730** - Carlos Cimini (Federal University of Minas Gerais (UFMG)) A novel approach for equivalence of Quad-QD laminates	**#243** - Margot Guiho (MBDA - ONERA) A framework for designing a 2D Woven Carbon/Carbon Composite model, validated with a structural scale demonstrator	**#1445** - Denise Hellmuth (University of Bayreuth) Development of Sustainable Furan Based Resin Matrices for Composite Materials via Catalyst and Flame Retardant Optimization	**#751** - Prasad Shimpi (ASOCIACIÓN DE INVESTIGACIÓN METALÚRGICA DEL NOROESTE (AIMEN)) Automated manufacturing of sheered fibre variable stiffness composites by dry fibre placement
10:00		**#1356** - Shenjie T Pinho (Imperial College London) Enabling full-safe composite design – Tailored laminate design for unstable compressive crack arrest in Fibre-Reinforced Polymers	**#1265** - Wei Tan (Queen Mary University of London) Multi-Fidelity Bayesian Optimisation for Inverse Design of Cellular Composites with Targeted Nonlinear Mechanical Response	**#641** - Grigori Osht (German Aerospace Center (DLR)) Towards Sovereign Digitalization in Composite Material Development: A Shift to "Science as a Service"	**#1038** - Shijie Zhang (Northwestern Polytechnical University) Characterizing Mixed-Mode Fracture Behavior in Composite-Metal Joints via Back Face Strain Derived Method	**#128** - Matt Miller (Bristol University) Scalable defect inspection of NCF preforms using polarisation imaging	**#1674** - Rina Sfar Zbed (IRT Antoine de Saint Exupéry) Experimental and numerical investigation of temperature and polymerization evolution during filament winding of Elium resin composites	**#254** - Junzi Liu (KU Leuven) Numerical and experimental investigation of temperature and polymerization evolution during filament winding of Elium resin composites	**#1252** - Liu Yang (University of Strathclyde) Additively manufactured high-performance polymer and composite for pump application	**#1367** - Shaoran Cheng (National Key Laboratory of Strength and Structural Integrity, School of Aeronautic Science and Engineering, Beihang University (BUAA)) Investigating the evolution of damage in 3D woven composites: thermomechanical experiments and an improved failure model	**#297** - Vickie Castano Maria (University Of Montpellier) Thermowelds in aeronautical composites: understanding their behaviour at the heart of their properties	**#575** - Félix Thébault (GeM) Optimizing the staggering of singularities in Automated Fiber Placement
10:15		**#1522** - Sandra Schmidt (Hochschule Darmstadt hda) The behaviour of paper composites under pressure loads and their failure modes	**#191** - Bunze Li (Imperial College London) Feasibility-Aware Bayesian Modelling and Optimization of Composite Structures with Failure Constraints	**#861** - Bence Szolderknyi (Department of Polymer Engineering, Faculty of Mechanical Engineering, Budapest University of Technology and Economics) A Digital Twin-driven workflow for structural design and failure analysis of continuous fiber reinforced 3D printed components	**#760** - Joanna Koman (Chalmers University of Technology) Turning Up the Heat: A Novel Xenon Flash Lamp Based Active Thermography Method for Revealing Composite Defects	**#596** - Alessandro Mille (Politecnico di Milano, Department of Chemistry, Materials and Chemical Engineering "Giulio Natta") Innovative mechanical recycling methods for vitrimer-matrix composites	**#674** - Shalee Upadhyay (Department of Aerospace Structures and Materials, TU Delft) Effect of slurry characteristics on the quality of Carbon fiber-PEEK thin-ply prepreg tapes manufactured by wet impregnation	**#157** - Yannis Grohmann (DLR) Temperature model for the direct resistance heating of carbon fiber tapes during fiber placement processes or filament winding	**#743** - Ruggero Volponi (CIRA Italian Aerospace Research Centre) Micro/Nano-structured Polyethylene Composites for Galactic Cosmic Radiation shielding.	**#1233** - Ended Ianw (University of Texas at Arlington) Fully Discrete Modelling of Brittle Fracture Modes in Composite Materials	**#695** - Ronan Bell Berman (LAMAE - Analysis and Advanced Materials for Structural Design, Polytechnic School, University of Girona.) Divergent Stress Evolution and Relaxation Pathways in Thermosets and Vitrimers	**#1398** - Florian Max (University of Bayreuth) Tack to the future: Influence of resin tack and AFP process parameters on interlaminar performance in natural fibre composites
10:30		**#1193** - Mark Battley (The University of Auckland) Influence of Stitching Pattern on the Fibre Misalignment and Static and Fatigue Compression Behaviour of Non-Crimp Fabric Composite Materials	**#399** - Luca Patrignani (Imperial College London) Graph Transformers for Effective Prediction of Progressive Failure Evolution in Composite Structures	**#1426** - Sergio Martínez Crespo (Instituto Tecnológico de Aragón (ITA)) Deep-Learning Based Surrogate Models for Resin Transfer Moulding Process Simulation	**#120** - Ulrike Sinner (BHT Berliner Hochschule für Technik) Non-destructive moisture detection for damage control in stitch-and-glue composite materials	**#188** - Lewis Griffin (University Of Bristol) Deconsolidation of semi-cured carbon-epoxy laminates at forming temperatures	**#1060** - Zirui Guo (The University of Tokyo) TAPE-LEVEL DETORMATION OF CFRTP-SMC DURING MOLDING FLOW INVESTIGATED BY SIMULATION AND X-CT TRACKING		**#891** - Sofia Scatragli (Department of Chemical Engineering Materials Environment, Sapienza University of Rome, Via Eudossiana 18) Bio-based PA11 Composites Incorporating space-derived lunar regolith simulant	**#1531** - Florian Goubier (Ecole Polytechnique) A Phase Field Formulation Accounting for Interfacial Fracture in AddiNewly Manufactured Polymers	**#1077** - Filip Kotoszz (Jukasiewicz Research Network - Krakow Institute of Technology) Thermomechanical properties and oxidation resistance of functionally graded, polymer derived SiOC/C matrix carbon fiber reinforced composites	**#1142** - Roberto Guzmán De Vill (University of Salamanca) Ultrasonic-assisted in-situ Consolidation of Carbon Fiber Thermoplastic Tapes
10:45		**#764** - Charles Shaw (Department of Chemistry, Imperial College London) Silica-epoxy nanocomposite matrix shear properties and their effect on unidirectional fibre composite compressive strength	**#453** - Moutafa Okumus (RMH, WMG, University of Warwick) Probabilistic Machine Learning Approach to Design of Polymer Composites for Hydrogen Permeation	**#521** - Jimmy Gaspard Jean (Delft University of Technology) Accelerating flow prediction in arbitrary fibrous microstructures with latent models	**#1084** - Eyuphan Kucukkafa (Faculty of Civil Engineering & Geosciences, Delft University of Technology) AI-Powered Vision-Tactile Sensing with an Autonomous Omni-UAV for BVID Detection in Laminated Composites	**#683** - George Holiday (NCC & BCI) CERAMIC COATINGS FOR PROTECTION OF POLYMER COMPOSITES FROM HIGH ENERGY EVENTS	**#1348** - Gianluigi Creonti (CROSFIRE Srl) Graphene Reinforced Glass and Recycled Carbon fabric based, Mass Productive, Circular Recyclable Crossprag®		**#586** - Beu Ni Ei Lue (Gyeongsang National University) Prediction and Validation of CFRP Deformation during Autoclave Curing with Orthotropic 3D-Printed Molds	**#779** - Raj Das (MMT University) Influence of Accelerated Moisture Absorption on Thermo-Mechanical Behaviour of Carbon Fibre Composites	**#473** - Won-chang Ryu (Gyeongsang National University) Quantifying the roles of interfacial fracture toughness and dispersion in strength degradation of graphene/CNT nanocomposites via phase-field/cohesive modeling	**#693** - Daniel Fernández Gonzá (Spanish National Reasearch Council (CSIC)-Nanomaterials and Nanotechnology Research Center (CINN)) Graphite-metal composites fabricated by spark plasma sintering	**#659** - Andreas Endruweit (University of Nottingham) Effect of the ply angle on tack between uni-directional prepreg tapes
11:00–11:30	**COFFEE BREAK**											
11:30–13:00	**SESSION 2**											
	Session →	**S510 - Understanding and improving longitudinal compressive strength**	**S519 - Fatigue and Damage Mechanics of composite and composite structures**	**S502 - Additive manufacturing (3D/4D printing, AFP) for advanced composites**	**S532 - Durability of polymers and fibre reinforced polymer composites**	**3.8 Fatigue**	**S512 - Long Discontinuous Fibre Composites: Processing, Microstructure, Properties and Performance**	**3.12 Joining and Joints**	**3.11 Other Application Domains**		**T2 - Interfaces & Bio-derived composites**	**5.10 Liquid Molding, Pultrusion, Filament Winding**
11:30		**#1093** - Bohao Zhang (Bristol Composites Institute, School of Civil, Aerospace and Design Engineering, University of Bristol) THE EXPERIMENTAL CHARACTERISATION OF COMPRESSIVE PERFORMANCE OF PULTRUDED CARBON FIBRE/EPOXY COMPOSITES	**#1586** - Marino Quaresimin (University Of Padova) INNOVATIVE ANALYSIS OF FATIGUE DAMAGE EVOLUTION AND STIFFNESS LOSS IN STRUCTURAL COMPOSITE COMPONENTS	**#1431** - António Le Duigou (University South Brittany) 4D printing of composite materials : Opportunity for disruptive functions ?	**#1343** - Sebastian Seidel (Fraunhofer Institute for Mechanics of Materials IWM) Time-resolved Study of CF/PPS and CF/Epoxy Aging Under Hygrothermal and in-situ Conditions	**#1340** - Nino Dutkovic (Leibniz-Institut für Verbundwerkstoffe) Polarization Image Analysis for the Monitoring of C-SMC Part Manufacturing	**#572** - Lily Sukhlis (University of Toulouse, Institut Clément Ader (UMR CNRS 5312) ISAE-SUPAERO / INSA / IMT-Mines ABI / UPS) Contribution to the study of damage in composite/metal structures under bearing stresses	**#1104** - Alexandre Lodoe (CERN) Advanced Composite Cryostat Design for Next-Generation High-Energy Physics Detectors at CERN		**#760** - Marianna Pilla (Università di Roma la Sapienza) Experimental and Computational Analysis of Bio-Inspired 3D-Printed Interlocking Interfaces	**#608** - Ben Thomas (University of Edinburgh) Evaluation of the Suitability of Multi-Stage Infusions for Thermoset Composite Laminates
11:45		**#1029** - Lars Pilgaard Mikkelse (DTU Wind) Compression strength predictions of pultruded carbon fiber profiles for wind turbine blades	**#1585** - Paolo Andrea Carraro (University of Padova) Prediction of the stiffness loss in woven composites in the presence of transverse bundle cracks due to cyclic loadings	**#689** - Pablo Romero-Rodríguez (AIMEN) Localized heating of high-performance composites with short and continuous carbon reinforcements	**#1102** - Kaiwei Ye (Department of Systems Innovation, School of Engineering, The University of Tokyo) MICRO-CT CHARACTERIZATION OF FLEXURAL-FATIGUE DAMAGE EVOLUTION IN CFRTP-SMC	**#1001** - Miguel Vieira de Carva (Unit of Composite Materials and Structures, Institute of Science and Innovation in Mechanical and Industrial Engineering (INEGI)) From Micro- to Meso-Scale: Modelling the Viscous and Anisotropic Behaviour of Aligned Discontinuous Fibre Composites	**#1096** - Hassan Ejaz (King Abdullah University of Science and Technology) Degradation of semi-structure bellâ€spot GFRP-pipe joint integrity due to air pocket and kissing bond defects	**#533** - Vincent Lutz (MGC Moser-Glaser AG, Pfiffner Group Switzerland) Advanced Polyester Textile-reinforced Epoxy Composites for High-Voltage Insulation	ESCM meeting	**#248** - Israa Arafat (Università Marie et Louis Pasteur, SUPMICROTECH, CNRS, Institut FEMTO-ST) Towards a better understanding of the fibre/matrix adhesion in flax/epoxy composites	**#513** - Seung Ho Sin (Pusan National University) Tailoring Transcrystallinity and Moisture Stability in PA6/PA12 Copolymer CFRTPs Fabricated by T-RTM
12:00		**#789** - Diana Colorenco (Institute Of Materials Chemistry And Research, University Of Vienna) Hierarchical nanostructured interphases for high performance carbon fibre-reinforced thermoplastic composites	**#714** - Sam Patel (Imperial College London) A Computationally Efficient HSL-FE Approach for Predicting Fibre Breakage in Composite Structures	**#414** - Muhammad Khizer Ali Kh (Khalifa University of Science and Technology) Energy absorption of 3D-printed PEEK/CF composites honeycombs with tubular CFRP reinforcements	**#368** - Thibault Haudricourt (ENSTA/ SAFRAN) Thermo-mechanical analysis on a 3D woven composite for evaluation of fatigue performance	**#520** - Peter Zobec (Faculty Of Mechanical Engineering, University Of Ljubljana) Complex loading and fatigue damage of composite sandwich structures	**#1031** - Richard Vocke (Faserinstitut Bremen e.V. (FIBRE)) Compression moulding with tape trim waste to manufacture structural components	**#68** - Shin-ichi Takeda (Japan Aerospace Exploration Agency) Proposal of the Modified Block Shear Method for Adhesively Bonded Composite Joints and Strength Evaluation	**#1369** - Amitha Ajith (IIT Madras) Tailoring Thermo-Mechanical Properties of Epoxy Using Magnetically Aligned Graphene Nanoplatelets		**#598** - Innes McKay (University of Strathclyde) Influence of Microbond Sample Preparation Method on Interfacial Strength in Flax, Glass, and Carbon PLA	**#1577** - Kiyoshi Uzawa (Innovative Composite Center at KIT) 7 Ultra-Fast Manufacturing of High-Pressure Hydrogen Tanks Using REDOX-Curing RTM and Non-PW Preforms
12:15		**#460** - Fabrizio Donisi (Rolls-Royce PLC) Bird-Strike and Fan Blade Off-compression type failures in Composite Fan Blades	**#1666** - Dominik Spancken (Fraunhofer Institute for Structural Durability and System Reliability LBF) Novel aspects from a fatigue database of the fatigue properties of short fibre-reinforced polymers	**#1653** - Joanna Wong (University of Calgary) Additively Manufactured Deployable Lattice Booms with Tailored Fiber Placement	**#107** - John Buckingham (University of Surrey) Comparison of moisture absorption in thermoset and thermoplastic matrix glass fibre polymer composites for accelerated ageing tests	**#939** - Shain Azadi (Politecnico di Milano) A Physics-Informed Neural Network for Fatigue Life Estimation in Fiber Reinforced Polymer Composites	**#1055** - Izumi Matsukura (IHI Corporation) Numerical and Experimental Evaluation of Fiber-Orientation Randomness in Discontinuous Carbon-Fiber-Reinforced Composites	**#1581** - Min Seong Hwang (Department of Mechanical Engineering, Gyeongsang National University) Numerical and Numerical Analysis of L-Flange Joints in Large Sandwich Composite Structures		**#98** - Marsh Veil (German Aerospace Center (DLR)) Influence of Laminate Architecture on the Torsional Behaviour of Filament-Wound CFRP Driveshafts	**#529** - Wonki Kim (Korea Advanced Institute of Science & Technology) Influence of winding pattern on the mechanical properties of wound composite structures
12:30		**#1035** - Gustavo Quino (Imperial College London) From corroSilent to composite: multiscale experiments for enhanced compression performance	**#999** - Masamichi Kawai (University of Tsukuba) A Critical Damage Growth Model for Notched Fatigue Fracture of CFRP Laminates at Various Stress Ratios	**#868** - Giovangiuseppe Giusto (CIRA - Italian Aerospace Research Centre) Effect of TP-AFP Processing Windows on ILSS and Crystallinity of CF/LM-PAEK Rectangular-Ring Laminates	**#436** - José Manuel Rodríguez (Universidad Carlos III) STRAIN RATE DEPENDENCY ON FRACTURE TOUGHNESS OF PLAIN WOVEN AS4/8552 CFRP USING IN SITU SYNCHROTRON X-RAY PHASE CONTRAST IMAGING	**#536** - Stefan Eder (Technical University of Leoben) Influence of PCR Polymers on Fatigue Life of Short Fiber-Reinforced Composites	**#1061** - Connie Qian (University of Sheffield) The First European Benchmark Exercise on Squeeze Flow Testing of High-Performance Carbon Fibre Sheet Moulding Compounds	**#563** - Michael Johnson (University of Nottingham) Reversible bonding of hybrid metallic-composite shafts	**#182** - Chamil Abeykoon (The University of Manchester) Evaluation of the Suitability of Carbon Fibre Reinforced Non-Metallic Pipelines for Oil and Gas Industry		**#1733** - Jaswinder Kaur (Laboratory of Molecular Science and Engineering, Abo Akademi University) Tailored Biorefinery Lignin via Fractionation and Depolymerization for Sustainable Epoxy Thermoset	**#387** - Hannah Rabe (Processing of Composites and Design for Recycling, Department Polymer Engineering and Science, Technical University of Leoben) Investigation of roving spreading on impregnation quality in the wet winding process using siphon impregnation
12:45		**#769** - Vincent Jacques (EASSAULT AVIATION) Effects of waviness on fiber failure in compression of carbon fiber reinforced polymer (CFRP) specimens: failure scenarios, modeling requirements, and predictive capabilities	**#946** - Brian Falzon (Western Sydney University) Influence of spin length on the synergistic mode I delamination behaviour of multi-scale toughened carbon fibre composites.	**#169** - Mariana Pereira (Politecnico Di Milano) Towards High-Value Recycling of Composites Using High Voltage Fragmentation	**#798** - Nawres Al-Ramahi (ETU) Use of Recycled Short Carbon Fibers for Anti-Icing Applications in Wind Turbine Blades	**#826** - Camiel Posthuma (University of Twente) 3D MICROSTRUCTURAL CHARACTERIZATION THROUGH MICRO-CT-BASED STATISTICAL ANALYSIS OF FIBER REINFORCED THERMOPLASTIC POLYMERS	**#1277** - Arunjunai Raj Mahendra (Kompetenzzentrum Holz GmbH- WOOD KPLUS) Paper-Based Printed Sensors for Multifunctional Monitoring in Fibre-Reinforced Composites	**#857** - Subha Reddy Deggamedi (Indian Institute of Technology, Tirupati) *On the determination of Fiber/Matrix interface mode-II Fatigue Parameters: A Concurrent Experimental & Computational Approach* --- **#901** - Akshay Sunil Sahni (Indian Institute of Science, Bangalore) Tailored interface by growing ZnO nanoflakes on CF surface using microwave radiation for CF/PEI laminates		**#1733** - Jaswinder Kaur (Laboratory of Molecular Science and Engineering, Abo Akademi University) Tailored Biorefinery Lignin via Fractionation and Depolymerization for Sustainable Epoxy Thermoset	**#387** - Hannah Rabe (Processing of Composites and Design for Recycling, Department Polymer Engineering and Science, Technical University of Leoben) Investigation of roving spreading on impregnation quality in the wet winding process using siphon impregnation
13:00–14:00	**LUNCH**											
14:00–14:30	**2 KEYNOTES (rooms A & B)**											
14:30–16:30	**SESSION 3**											
	Session →	**S501 - Delaminations and debonding in composite materials and structures**	**S511 - Advanced Composite Materials and Structures: Multifunctional Design, Damage Diagnostics, Testing, and Modelling**	**3.8 Fatigue**	**4.3 Energy Storage and Harvesting**	**S517 - Image-based analysis of composite features**	**7.6 Composite Pressure Vessels**	**1.3 Civil Engineering and Architecture**	**7.11 Recycling, Remanufacturing, and Circular Economy**	**3.7 Failure Mechanics and Simulations**	**5.13 Process Modelling and Simulation**	**2.1 Bio-Derived and Sustainable Composites**
14:30		**#345** - Luca Michele Martulli (Politecnico di Milano) The sequential static-fatigue approach to model delamination propagations: a comparison between VCCT and cohesive implementation	**#461** - Rixanmeire de Alves Lima (EMEC, Instituto Superior Técnico) 3D printed multi-functional microstructures for vitrimer-based composite bonded joints	**#34** - Sofia Sartorio (Department of Aerospace Structures and Materials, Faculty of Aerospace Engineering, Delft University of Technology) How can damping capacity be used to characterise fatigue behaviour of thermoplastic composites?	**#1019** - Emile S Greenhalgh (Department of Aeronautics, Imperial College London) Fractographic Insights Into the Optimum Microstructures for Structural Supercapacitors	**#636** - Baris Caglar (TU Delft) Fiber detection in microstructural images of composites: benchmarking and sensibility analysis of segmentation methods	**#1059** - Muhammad Shokhi (Department of Materials Engineering, KU Leuven) Efficient Damage Prediction in Composite Pressure Vessels through Representative Modelling	**#138** - Lucija Stopinac (EPFL) Additively Manufactured Polymeric TPMS Façade	**#1379** - Yuju Ozbek (Sabanci University) From APP Waste to Flight-Ready Sandwich Skins: Strand-Tailored Skins, Core-Stabilized Geometry, and Plasma-Activated Bonding	**#373** - Pierre-Alexandre Bouch (EPFL) Machine Learning Surrogate Models for Hashin-3D Failure Prediction in Thick FRP Laminates	**#181** - Mouadh Boukhar (Institut Clément Ader, Université de Toulouse, CNRS UMR 5312, IMT Mines Albi, UPS, INSA, ISAE-SUPAERO) Numerical simulation of liquid resin impregnation in a real digitized reinforcement during Liquid Composites Molding processes accounting for capillary effects	**#280** - Khurshid Malik (1)Department of management and Engineering, Linköping University) ADVANCING SUSTAINABLE MARINE MATERIALS WITH GRAPHENE-COATED NATURAL FIBER COMPOSITES
14:45		**#1490** - Panayiotis Tsokanas (Department of Materials Engineering, KU Leuven) Effect of interface ply orientation on mode II delamination observed by in situ X-ray computed tomography	**#1245** - Alberto Ciampaglia (Politecnico di Torino) Self-Sensing Capability of Hybrid Short Carbon/Glass Fiber Thermoplastic Composites for Damage Monitoring under Static and Fatigue Loading	**#249** - Wajih Akleh (Université Marie et Louis Pasteur, SUPMICROTECH, CNRS, Institut FEMTO-ST) Fatigue Analysis and Residual Strength Evolution of High-Performance Unidirectional Carbon Fibre Composites for Hydrogen Storage Applications: Characterisation Using Split-Disk Ring Tests	**#799** - Beatriz Anouca Maia (INEGI) Revolutionizing Energy Storage with Coaxial Structural Batteries	**#327** - Vincent Maes (University of Bristol) Benchmark Activity for micro-Structure Image-processing for Composites: Voids in 2D	**#912** - Youssef Mraidi (Technical university of munich, TUM School of Engineering and Design, Chair for Carbon Composites) Manufacturing of carbon fiber-reinforced boss elements for energy storage in space applications	**#157** - Won-Kee Hong (Department of Architectural Engineering, Kyung Hee University) Data-centric Lagrange based multiple objective optimizations of bisalal loaded rectangular columns using nonlinear programming	**#271** - Amit Chanda (School of Mechanical and Aerospace Engineering, Nanyang Technological University (NTU)) Spinhaut-assisted Debonding-on-demand Structural Adhesives for Recyclable Composite Structures	**#711** - Alexy Taillour (EMAS, ONERA, Université Paris Saclay) Modelling the effect of out-of-plane waviness defects on damage and failure of thermoset laminates	**#1242** - Etienne Dubois (PIMM (ENSAM, CNAM, CNRS)) In-situ Control and Modeling of the Liquid Composite Molding Process – Non-Intrusive Monitoring of the Degree of Polymerization	**#133** - Pooria Khalili (University of Borås) Sustainable Hybrid Natural Fiber Composites: Mechanical Performance and Life Cycle Assessment Considerations
15:00		**#1627** - Benf F. Sørensen (Technical University Of Denmark) Similitude in delamination crack growth with large-scale fibre bridging	**#578** - Davood Peyrow Hedayati (Advanced Materials and Structures Lab (AMSL), Faculty of Engineering, Leipzig University of Applied Sciences (HTWK Leipzig)) Damage-Induced Electrochemical Degradation in Structural Supercapacitors	**#838** - Andrea Bernasconi (Politecnico di Milano) Fatigue resistance and self-healing of carbon fiber reinforced vitrimers subjected to bending	**#1065** - Ella Olimonidou (Imperial College London) Thermoplastic Structural Electrolytes	**#1256** - Robin Hartley (University of Bristol) Improving Fibre Segmentation in CFRP Micrographs Through Phase-Aware Shading Correction	**#130** - Marie Hondekyn (Department of Materials, Textiles and Chemical Engineering, Ghent University) An Analytical Framework for the Mechanical Analysis of Thick-Walled Hydrogen Pressure Vessels Including Manufacturing Variations	**#709** - Helena Rocha (PIEP - Centro for innovation in Polymer Engineering) Lightweight Double Curvature Sandwich Panels with improved Fire Reaction for Façade Panels	**#896** - Laura Mazzocchetti (University of Bologna - Dept. of Industrial Chemistry "Toso Montanari") Overcoming the valley of death: FIB3R, a successful story of research to innovation in the field of carbon fiber recycling	**#1124** - Peng Lu (The University of Tokyo) MONTE CARLO SIMULATION OF PARALLELOGRAM TAPE CFRTP-SMC USING A CALCULUS BASED GEOMETRIC ABSTRACTION SUPPORTED BY TENSILE TESTS AND CT-SCAN OBSERVATIONS	**#255** - Naim Ali (Mechanics of Materials and Structures, Department of Materials, Textiles and Chemical Engineering, Ghent University, Technologiepark Zwijnaarde 46, 9052 Zwijnaarde, Belgium) Finite Element (FE) Investigation of Process-Induced Residual Stresses in Type-IV Composite Pressure Vessels: Implications for Enhanced Design Reliability	**#1462** - Lukas Hartz (School of Engineering/ Bernal Institute/ University of Limerick) Prevention of kinken during the thermal treatment of melt-spun lignin precursor fibers for scaled-up production of carbon fibres.
15:15		**#1504** - Stergios Goudinos (Norwegian University of Science and Technology) Predicting the transition from static to unstable crack propagation for a specimen under mixed-mode loading	**#828** - Muhammad Yasir Khalid (Khalifa University) Embedded GNP-Epoxy Films: A Route to Multifunctional GFRP Composites	**#128** - Kiminyoshi Naito (National Institute for Materials Science) Static and fatigue tensile properties of epoxy-vitrimer-based CFRP	**#884** - Sourav Patnanaikh (Shaping Matter Lab, Faculty of Aerospace Engineering, Delft University of Technology) Structural Supercapacitors with Graphene-Modified High-Surface-Area Carbon Electrodes and Gel-Polymer Electrolyte Separators	**#630** - Christian Dörrich (TU Dresden - Institute for Lightweight Engineering and Polymer Technology) FFT- and Image-Based Phase-Field Simulations for Descriptor-Based Structure–Property Relationships in Fiber Reinforced Polymers with Manufacturing-Related Imperfections	**#1693** - Pratt Singh Sandhu (Institute of Lightweight Engineering and Structural Mechanics, Technical University of Darmstadt) Closed-form Analytical Modelling of Thick-walled Cylindrical Composite Pressure Vessels with Variable Dome Curvature	**#1437** - Marco Alexey Elías (UNIVERSIDAD DE MINHO, Azurém) SOLAR EXPOSURE PATTERNS AND SELF-SHADOWING EFFECTS ON SERVICE TEMPERATURE PREDICTIONS IN HYBRID GFRP–CONCRETE BRIDGE	**#207** - Simon Backens (Fraunhofer Institute for Large Structures in Production Engineering IGP) Study of post-treatment techniques for recycled carbon fibers to improve fiber-matrix bonding with epoxy resin by transverse fiber bundle tensile tests	**#195** - Akash Sharma (Mechanics of Materials and Structures, Department of Materials, Textiles and Chemical Engineering, Ghent University, Technologiepark Zwijnaarde 46, 9052 Zwijnaarde, Belgium) High-Fidelity Finite Element (FE) Modelling for Type-IV Composite Pressure Vessels: Predicting Damage Behaviour and Assessing the Influence of Local Defects	**#851** - Yuto Maeki (Tokyo University of Science, Laboratory of Kosenaga) Numerical Simulation of Post-Forming Shape and Thermal Residual Stress in L-Shaped Thermoplastic CFRP Components	**#671** - Sarina Schulte (Hochschule Hannover - University of Applied Sciences and Arts) Process-Structure-Property Relationships in Flax Fiber-Reinforced Composites Using PLA and PA11 Film Stacks for Lightweight Applications
15:30		**#1047** - Jonus Richter (Institute of Lightweight Engineering and Polymer Technology, TUD Dresden University of Technology) Strain rate dependent delamination behavior of hybrid sandwich composites with modified interlaminar interfaces for crash loading scenarios	**#477** - Pauline Reurdo (CETIM, 'Advanced materials and Component Engineering' Department) Longitudinal tensile strength characterisation using NOL test: definition of an explicit expression based on experimental and numerical approaches	**#129** - Hiroyuki Oguma (National Institute for Materials Science) Experimental Study on S-N Characteristics and Failure Mechanisms of CFRP and GFRP in Cryogenic Environments	**#127** - Ali Hadigheh (School of Civil Engineering, Faculty of Engineering, The University of Sydney) Enhancing the Electrochemical Performance of Alkali-Activated Electrolytes for Supercapacitor Applications		**#446** - Cedric Fuchs (Leibniz-Institut für Verbundwerkstoffe GmbH) Thermoplastic high-pressure hydrogen vessels with load-bearing capability	**#1622** - Alibeda Samkova (Technical University of Liberec) Viscose lens weave as a sustainable alternative to glass fiber leno weave in gypsum-based composites	**#504** - Elsa Bezi (Delft University of Technology, Department of Materials Science and Engineering) Unravelling the Mechanisms of Electrochemical CFRP Recycling		**#164** - Erik Jungsteidt (Mips AB) A Numerical Investigation of the Consolidation Behaviour of Composite Helmet Shells	**#933** - Vito Gigante (Università di Pisa) Recycled Poly(butylene succinate) (PBS)- Cellulose Fibre Biocomposites: Processing Optimisation for Fused Granulate Fabrication (FGF)
15:45		**#638** - Carolina Oliveira (Faculty of Aerospace Engineering, Aerospace Structures and Materials, Delft University of Technology) Do Delaminations Matter? Understanding Their Structural Impact on Wind Turbine Blade Spar Caps	**#1138** - Carlo Gotti (Advanced Mechanics and Materials-Interdepartmental Center for Industrial Research (CIRI MAM) - University of Bologna) Capacitive Structural Health Monitoring of Hybrid Metal–Composite Joints	**#925** - Gabriela Loi (University of Cagliari) Fatigue performance of stepped lap-composite joints reinforced with metal 2-pins	**#1497** - Martin Fagerström (Chalmers University of Technology) Sensing and Simulating: Automated X-ray CT-Based Mesoscale Modeling of As-Manufactured Textile Composites	**#1497** - Martin Fagerström (Chalmers University of Technology) Sensing and Simulating: Automated X-ray CT-Based Mesoscale Modeling of As-Manufactured Textile Composites	**#1412** - Ryoma Aoki (Japan Aerospace Exploration Agency) Parametric Evaluation of Winding-Angle Effects on Fatigue-Induced Residual Burst Strength in Filament-Wound CFRP Hydrogen Tanks	**#505** - Duarte Dias (Fibrenamics – Institute for Innovation in Fiber and Composites Materials) Self-Sensing Braided Composite Rebars for Next-Generation Concrete Structures	**#1356** - Zhiyu Ye (

ECCM22 — TUESDAY (08:00–18:00) — PRELIMINARY TECHNICAL PROGRAMME (version of 7 June 2026)
◆ + italic = Short oral (7 min) · plain = Full oral (15 min) · Minor changes to the programme may occur.

Time	Activity	A	B	C	D	Forum	M1	M2	M4	M5	Balder	Odin
08:00–08:45	PLENARY 2											
09:00–11:00	SESSION 1											
	Session →	**SS10 · Understanding and improving longitudinal compressive strength**	**SS21 · Computed tomography**	**SS07 · Cryogenic Testing and Material Characterisation**	**SS08 · Experimentation and Modelling of Composite Materials and Structures under Dynamic Loading and Environmental Conditions**	**SS26 · EcoComposites Cluster - Sustainability of composites in the transportation sector**	**SS14 · Session Honoring Mostafa Abdalla**	**2.1 Bio-Derived and Sustainable Composites**	**SS18 · Composite Materials for Hydrogen Economy**	**3.9 Fracture and Damage**	**3.15 Multiphysics Modelling**	**SS03 · Power Ultrasonics in Processing and Joining of Composites and Multi-Materials**
09:00					#866 · Anastasios P. Vassilopoulos (Composite Mechanics Group (GR-MeC), Ecole Polytechnique Fédérale de Lausanne (EPFL)) EBR CFRP–Concrete Bond Durability Modelling under Prolonged Water Immersion	#488 · Alexandros Georgios St (Innovation in Research and Engineering Solutions SNC (IRES)) Modeling the CO2 Mitigation Potential of Bio-Based and Recycled Composite Materials	#965 · Daniël Peeters (Delft University of Technology) How to determine the influence of gaps in automated fibre placement?	#561 · Kohta Tanaka (Waseda University) Fabrication of Furan/Glass Fiber Composites Using Acid Adsorbent and Improvement of Their Mechanical Properties by Silane Treatment of Glass Fibers	#174 · Lukasz Figiel (University of Warwick) Modelling and experimental study of hydrogen permeation in polymer composites	#784 · Carlos Sandino (Universidad de Sevilla) Effect of Ply Thickness on Transverse Damage Tunnelling in Glass/Epoxy Laminates	#341 · Mohammad Rouhi (RISE Research Institutes of Sweden) Multiphysics Simulation of Linerless CFRP Tank for LH2 Storage	#669 · Moritz Liesegang (RPTU Rheinland-Pfälzische Technische Universität Kaiserslautern-Landau) Processing and Repair of Fibre-Reinforced Polymers and Fibre-Metal Laminates by Power Ultrasonics
09:15					#395 · Nontanasorn Budninpech (University of Bristol) Effect of temperature and loading rate on the mode II interlaminar fracture toughness of glass fibre reinforced bioepoxy composites	#841 · Jan-Marten Sprenger (Fraunhofer IFAM) Efficient processing of biobased benzoxazines: A step towards sustainable biocomposite manufacturing through catalysed curing	#467 · Alexandre Morland (DELFT UNIVERSITY OF TECHNOLOGY) Assessing the impact of fiber angle deviations and gaps on the structural performance of variable stiffness laminates	#204 · Wim Van Paepegem (Ghent University, Mechanics of Materials and Structures) Development of recyclable vitrimer matrix systems for infusion processes in large-volume applications	#431 · Bernd Wetzel (Leibniz-Institut für Verbundwerkstoffe GmbH (IVW)) Hydrogen permeability of composites for type 5 hydrogen tanks	#450 · Gergely Czél (Budapest University of Technology and Economics) Mode II fracture toughness modified laminates: Damage development under out-of-plane loading and residual compressive strength	#400 · Hyoung Jun Lim (Gyeongsang National University) Finite element simulation of stamp-forming-induced deformation in thermoplastic composites	#1172 · Lukas Neumair (DLR e.V. Institute of Structures and Design, Center for Lightweight-Production-Technology) Displacement-Controlled Ultrasonic Welding of Carbon Fiber Reinforced LM PAEK Laminates - Increased Process Reliability and Repeatable Joint Properties
09:30		#244 · Bodo Fiedler (Hamburg University of Technology, Institute of Polymers and Composites) Influence of Fibre Misalignment and Temperature on the Compressive failure of GFRP	#834 · Kosuke Takahashi (Hokkaido University) Three-Dimensional Nano-Imaging of Interface Crack Growth Along Carbon Fibers Under Cyclic Loading	#385 · Stefanos Giannis (National Physical Laboratory) Instrumented nanoindentation at cryogenic temperatures: A method for fibre/matrix characterisation	#45 · Ziwen Xu (Harbin Institute of Technology) Investigation of scaling effects in the impact response of CFPR woven composites	#415 · Guillaume Vincent (Nantes University, IRT Jules Verne) Sustainable manufacturing of hollow parts from staple yarns and bladder-assisted RTM	#973 · Aranshu Modi (Delft University of Technology (TU Delft)) Lamination parameters for hybrid composite laminates	#1160 · Festus Ifeanyi Anagwu (Luxembourg Institute of Science and Technology) High-performance glass fibre polybenzoxazine vitrimer composite for aircraft interior application	#875 · Ibrahim Sebei (ENSAM) Towards Optimal Fabrication of Composite Hydrogen Pressure Vessels: Coupling Design and Manufacturing through WoundSim-Based Surrogate Optimization	#1090 · Theodoros Loutas (University of Patras) Physics-Informed Neural Network for Fracture Mechanics in Composite Structures	#509 · Paul Krauskopf (Groupe de Physique Des Matériaux (GPM INSA Rouen) / Safran Nacelles) Analysis of the thermo-mechanical behaviour of an aeronautical composite–metal bolted assembly undergoing a fire test	#1440 · Maryam Ahanpanjeh (Helmut Schmidt University) Hybrid Force and Trajectory Control for Improving Weld Quality in Robotic Continuous Ultrasonic Welding of CFR-TP
09:45		#1043 · Milo Shaffer (Imperial College London) From constituents to composites: the NextCOMP project to enhance compression performance	#1159 · Alice Pagnanini (Department of Materials Engineering, KU Leuven) Evolution of microstructural damage of aligned discontinuous carbon fibre-reinforced composites under in situ Synchrotron Computed Tomography	#482 · Nils Wieja (TUD Dresden University of Technology, Institute of Lightweight Engineering and Polymer Technology) Cryogenic cycling effects on the gas permeability of CF/LM-PAEK	#229 · Clement Watremez (ISL) Dynamic characterisation using laser impact loading of damage properties of UHMWPE-fibres based composites used in ballistic protection	#1295 · Mona Jamali Moghadam S (Université Côte d'Azur, Institut de Chimie de Nice, UMR CNRS 7272, 06108 Nice Cedex 2) Fast curing bio derived epoxy thermoset with tunable hardener systems for high performance industrial applications and demonstrated chemical recycling	#541 · Sergio Turteltaub (Delft University of Technology) Experimental and numerical characterization of buckling-induced skin-stringer delamination growth in thermoplastic composite panels	#208 · Sithiprumnea Dul (Laboratory for Advanced Fibers, Empa) Development of Overcoated Prepreg Filaments for Sustainable Composites	#1207 · Maria Grazia De Angeli (University of Edinburgh) Multiscale modeling and experimental characterization of semicrystalline polymers for hydrogen barrier applications	#298 · Isha Gupta (University of Southampton) Assessing Damage Modes in Architected Interpenetrating Metal- Polymer Phase Composites Using X-ray CT	#468 · Kaan Deniz (Bristol Composites Institute, University of Bristol) A STRONGLY COUPLED THERMO-MECHANICAL MODEL FOR THE SIMULATIONS OF THERMOPLASTIC COMPOSITES FAST PROCESSING	#864 · Bram Jongbloed (SAM XL) An alternative heating-phase control method for continuous ultrasonic welding of thermoplastic composites
10:00		#350 · Pinelopi Mageira (DTU Wind, Technical University of Denmark) Finite element modelling of unidirectional carbon fiber notched composite under compression using in-situ X-ray scanned fiber orientation data	#680 · Chih-Yu Chen (Chair of Carbon Composites, TUM School of Engineering and Design, Technical University of Munich) Microstructural Analysis of Compacted Continuous Fiber 3D Printed Parts Using In-Situ X-ray Computed Tomography	#1360 · Nikhil Bharat (AMADE, Analysis and Advanced Materials for Structural Design, Polytechnic School, University of Girona, Campus Montilivi, Edif. PII, E17003 Girona, Catalonia, Spain) Cryogenic permeability of LM-PAEK CFRP laminates under thermo-mechanical exposure	#1747 · Xiyao Sun (University of Oxford) Characterising damage mechanisms of CFRP laminates under high-strain-rate loading and extreme temperatures using synchrotron X-ray imaging	#572 · Justine Martin (COMPOSITEC) Development of sustainable composite for automotive applications	#733 · Lander Vertonghen (DMAS, ONERA, Université Paris-Saclay) Introducing fiber steering in a stacking sequence table for improved performance matching in a bi-level composite optimization	#1455 · Sandu Cibotaru (Université Côte d'Azur) Flavonoid-Derived Thermosets: A Dual Strategy for High Performance and Polymer Circularity	#1384 · Martin Starke (University of Technology Dresden, Insitute of Aerospace Engineering, Chair of Aircraft Engineering) Design and simulation of load-bearing hydrogen tank integrations in wing structures	#724 · Paulo Pereira (INEGI, Faculdade de Engenharia, Universidade do Porto, Rua Dr. Roberto Frias, 4200-465 Porto, Portugal) THE EFFECT OF MISMATCH ANGLE OF DOUBLE-DOUBLE COMPOSITE LAMINATES UNDER QUASI-STATIC AND FATIGUE LOADING CONDITIONS	#580 · Yu Wang (Laboratoire FAST,CNRS,Université Paris-Saclay) Avalanche description focusing on the twisted yarn under tensile loading	#287 · Edoardo Toscano (DTU Civil and Mechanical Engineering) Predictive Model for Temperature and Mechanical Strength in Ultrasonic Spot Welds of Binder-stabilized Glass Fiber Preforms
10:15		#441 · Dimitrios Bikos (Department of Mechanical Engineering, Imperial College London) BENCHMARKING MICROMECHANICAL FINITE ELEMENT MODELS OF UD-FRPS AGAINST IN-SITU COMPRESSION EXPERIMENTS	#924 · Sudip Bose (Henry Royce Institute, Department of Materials, University of Manchester) Rapid Inspection of GFRP Composites leveraging Digital Tomosynthesis: A Comparative Performance Study with X-ray CT	#1287 · Radovan Fridrich (National Physical Laboratory) Mode I fracture toughness at cryogenic temperatures: Is crack growth monitoring necessary?	#1411 · Karthik Ram Ramakrishn (University of Bristol) Effect of temperature and strain rate on the translaminar fracture of thermoplastic composites	#737 · Stefania Termine (R-NanoLab, School of Chemical Engineering, National Technical University of Athens) Innovative Carbonisation-Pyrolysis Process: Set-up of the reclamation line and CFRP recycling functionality assessment	#1381 · Javad Fatemi (Airbus Netherlands) Fiber Steering for Variable Stiffness Composites: A Technology Development Program for Next-Generation Rocket Engine Frames	#85 · Carol Rodricks (Bundesanstalt für Materialforschung und -prüfung (BAM)) Novel Recyclable Hierarchical Carbon Fibre/Epoxy Composites: Preserving Fibre Length and Orientation Using Elium®	#367 · Luz Aguilar (IMT Nord Europe, KU Leuven) Realistic fibrous structure of Elium-based filament wound hydrogen storage tanks	#619 · Mohamed Beshr (Technological University Dublin) Influence of Loading and Environmental Conditions on Adhesively Bonded Composite Joints: Assessing Controlled Polymer Ablation as a Surface Pre-Treatment	#947 · Jiaxue Li (Beihang University) Research on the Ablation Response Prediction Method for C/SiC Ceramic Matrix Composites	#881 · Daiki Tanabe (Kobe City College of Technology) Evaluation on Ultrasonic Welding Behavior and Joining Strength of CF/Epoxy Laminates and CF/PEEK Thermal Pultruded Rods Using Spread CF/PEI Semipreg Layer
10:30		#643 · Laura Rhian Pickard (Bristol Composites Institute, University of Bristol) Compressive Performance of Hierarchical Pultruded Rod Based Composites	#397 · Salaheddine Madi (Ku Leuven) Linking microstructure to strain localisation in fibre reinforced composites: a PCA-based analysis of in situ biaxial XCT–DVC experiments	#1410 · Jakub Tabin (Institute of Fundamental Technological Research, Polish Academy of Sciences) DIC-enhanced experimental platform with a multi-detector array for mechanical test of composite materials at 4 K and 77 K	#234 · Anna Williams (University of Bristol) Hot/Wet Interlaminar Fracture Characterisation of A Newly Developed Phenolic-Triazine Ester Composite System	#781 · Megha Rani (Leibniz-Institut für Verbundwerkstoffe GmbH) Comparative Study of Bio-Based and Conventional Epoxy Resins in Unidirectional Filament-Wound Coupons for Sustainable Hydrogen Storage Applications	#1154 · Arne Wulff (Delft University of Technology, Faculty of Aerospace Engineering) Quantum-Assisted Stacking Sequence Retrieval and Laminated Composite Design	#1461 · Veronica Ambrogi (DICMaPI, University of Naples Federico II) VITRIMERIC COMPOSITES BASED ON OH-RICH WASTE FILLERS	#1179 · Tibe Van Remoortel (KU Leuven) Spatial Geometric Uncertainty Quantification in Filament-Wound Composite Pressure Vessels	#1644 · Ibrahim Goda (LEM3, Arts et Métiers Paris Tech, Université de Lorraine) Numerical Investigation of Damage Evolution and Energy Absorption in 3D Auxetic Sandwich Structures Under High-Velocity Impact	#1600 · Athina Maria Theochari (NTNU) A parametric diffusion-deformation study for polymers used in the hydrogen transport infrastructure	#1323 · Awais Awan (Institute of Materials Science, Joining and Forming (IMAT), Professorship "Aviation Materials and Manufacturing Techniques", Graz University of Technology) Wood-polymer hybrid joints produced via ultrasonic energy for lightweight structures
10:45		#746 · Kasper Foss Hansen (Department of Mechanical Engineering, Imperial College London) Non-linear compressive response of aligned recycled carbon fibre composites through 4-point bending of sandwich beams	#1044 · Ali Barzegar (Sabanci University) Microscale Air Permeability Characterization of LAFP Composites via Micro-CT Imaging and Comparison with Macroscale Pulse-Decay Measurements	#1045 · Jonas Appels (DLR Institute of Lightweight Systems) Liquid Hydrogen Testing of Tubular CFRP Specimens	#1235 · Fulvio Pinto (University of Bath, Department of Mechanical Engineering) Effect of Moisture Absorption on the Dynamic Compressive Behaviour of Polymeric Syntactic Foams	#351 · Inge Schlapp-hackl (Aalto University) Transforming Textile Waste into Durable Composite Fibers for a Sustainable Future.	#1237 · Roeland De Breuker (Delft University of Technology) A review of 20 years aeroelastic tailoring research at the Delft University of Technology	#831 · Teahoon Park (Korea Institute of Materials Science) Sustainable Dual-Nucleation Engineering for Fast-Crystallizing, High-HDT PLA	#216 · Amir Mehrabianbardar (Arts et Metiers Paris tech.) Multiscale experimental analysis and AI-assisted optimization of bio-based UDCF/ PA11 composite laminates via VBO processing	#96 · Otavio Zimmermann De A (1) Repairability and residual strength of impacted carbon/PPS laminates in a marine environment	#1487 · Dariusz Perkowski (Bialystok University of Technology) Numerical Analysis of Coupled Thermomechanics, Kinetics and Residual Stress Development in Fibre-Reinforced Composites Using Fast-Curing Resins	#1414 · Manuel Francis Roth (Walter-and-Ingeborg-Herrmann Chair for Power Ultrasonics and Engineering of Functional Materials (EFM), Department of Sustainable Systems Engineering (INATECH), Faculty of Engineering, University of Freiburg) Ultrasonic welding of 3D-printed lignocellulosic biocomposites with integrated energy directors
11:00–11:30	COFFEE BREAK											
11:30–12:45	SESSION 2											
	Session →	**SS11 · Advanced Composite Materials and Structures: Multifunctional Design, Damage Diagnostics, Testing, and Modeling**	**SS29 · Multi matrix composites – design principles and processing technologies**	**SS07 · Cryogenic Testing and Material Characterisation**	**4.6 Novel Test Methods**	**5.14 Sustainable Manufacturing**	**2.7 Hybrid and Hierarchical Composites**	**7.11 Recycling, Remanufacturing, and Circular Economy**	**T1 · Aerospace & Transport**	**5.6 Automated Placement Technologies**	**6.3 Energy Storage and Harvesting**	**SS22 · Toroidal Propellers for Efficient and Sustainable Aviation - The TorPropel project**
11:30		#852 · Ioannis Katsivalis (University of Bath) Adhesive bonding of thin Tow-Based Discontinuous Composites: Damage characterisation and analysis	#230 · Michael Müller-Pabel (Institute of Lightweight Engineering and Polymer Technology (ILK), TU Dresden) Recyclable Building Block Structures based on local use of cleavable resin: manufacturing and separation studies	#1344 · Andrew Rhead (University of Bath) Overview of cryogenic mechanical testing at the University of Bath	#1532 · E'ouann Kerino (Laboratory for Multiscale Mechanics (LM2), Polytechnique Montréal) Mode I fracture characterization of high-temperature 3D-printed PEI-CF using an adhesion-inhibition pre-cracking methodology	#502 · Eunice Cunha (FIDAMC - Foundation for the Research, Development and Application of Composite Materials) Sustainable Vitrimer CFRPs: Manufacturing Pathways and Reprocessing Capabilities	#176 · Valter Carvelli (Politecnico di Milano) DELAMINATION CHARACTERIZATION AND TENSILE DAMAGE EVOLUTION IN UNIDIRECTIONAL ALL-CARBON HYBRID LAMINATES	#503 · Mónica Peñas Caballero (Foundation for the Research, Development and Application of Composite Materials (FIDAMC)) Valorization of prepreg scrap through calendaring-based recycling	◆*#265 · Prakash Jadhav (SRM University AP)* *Design Optimization of Metal Leading Edge Cap Joint in a Composite Fan Blade of Aircraft Engine subjected to Static Flexure and Thermal Loading*	#1728 · Hong Ma (Northwestern Polytechnical University) Manufacturing CF/PEEK composites by laser-assisted tape placement with elevated tool temperature for crystallinity and interphase control	#1772 · Suraj Kalia (Indian Institute of Technology Jammu) Design of Biphasic Structural Battery Electrolytes and Their Thermo-Mechanical Characterization	#289 · Noor Rehman (TUM School of Engineering and Design, Chair of Carbon Composites, Technical University of Munich) An Experimental–Numerical Approach to Assess Tooling-Driven Process-Induced Distortions in Composite Manufacturing
11:45		#1131 · Angel Mora (York University) Numerical modeling of magnetorheological polymers fabricated with the aid of a magnetic field	#237 · Dong Gi Seong (Pusan National University) A multi-drop filling process of multi-matrix on multi-fabric for deployable composites fabrication	#752 · Martin Liebisch (Deutsches Zentrum für Luft- und Raumfahrt e.V.) The Scaled Half Tank Test	#527 · Maialen Garaigordobil (IDEKO S.coop) Validation of a Novel Wireless Monitoring Approach for the Filling and Curing Stages in Vacuum-Assisted Infusion of Carbon Fiber-Reinforced Composite Parts for Aerospace	#1643 · Fidel Orlando Valega M (TNO) Towards new products from recycled composites via fused granulate fabrication	#158 · Maria Asun Cantera (University of the Basque Country UPV/EHU) Synthesis of Double-Double Hybrid Laminates Exhibiting Unconventional Thermal Expansion Behaviour	#604 · Harper Schäfer (Technische Universität Braunschweig) Closed-Loop Recycling of Resistance-Welded Thermoplastic Composite Joints: Influence of Heating Element Material on Disassembly and Rewelding	◆*#755 · Paul Nixon (University of Strathclyde)* *Rain Erosion Resistance of Laser Perforated Carbon Fibre Composites for Leading Edge Aerospace Applications*	#1086 · Jonas von Heusinger (Deutsches Zentrum für Luft- und Raumfahrt e.V.) Efficiency of different compactor types for Joule heating assisted thermoplastic cfrp winding processes	#568 · Jawon Ha (Korea Advanced Institute of Science and Technology) Transition-Metal Nanowire–Integrated Carbon Fiber Electrodes for Structural Batteries	#1520 · Alkiviadis Paipetis (UNIVERSITY OF IOANNINA) TheTorpropel Project: Concept, Objectives, Methodologies, Impact
12:00		#688 · Victor Lancrenon (Laboratoire des Composites ThermoStructuraux (LCTS) / Safran Ceramics) Identification of the damage mechanism in a ceramic matrix composite / protection (CMC-EBC) system under tensile test	#927 · Richard Grothe (TUD Dresden University of Technology / ILK Institute of Lightweight Engineering and Polymer Technology) RTM Co-Infiltration of Continuous Fiber Composites Using Two Epoxy Matrix Systems: Process Control and Interphase Analysis	#795 · Suzanne Laik (CETIM) Development of quasi-static testing and characterization of CF/PEI composite under Liquid Hydrogen immersion	#121 · Benjamin Lacombe (Safran Ceramics) Novel Approach for Non-Propagation Threshold Evaluation under Fatigue in Ceramic Matrix Composites	#170 · Clement Broggi (Aerospace Structures and Materials Department, Faculty of Aerospace Engineering, Delft University of Technology) Material heterogeneities in Frontal Polymerization	#731 · Tommaso Verdini (Università Politecnica delle Marche) Mechanical Performance of Hybrid CFRP/BFRP Filament-Wound Tubular components	#848 · Ilaria Rossitti (Polymers Composites and Hybrids (PCH), IMT Mines Alés) INVESTIGATING THE EFFECTS OF FIBER SURFACE TREATMENT AND RECYCLING ON OUT-OF-PLANE WICKING IN YARNS	◆*#747 · João Pedro Alves (INEGI - Institute of Science and Innovation in Mechanical and Industrial Engineering)* *Structural Design of a Biocomposite Monocoque Chassis for a Light Electric Two-Wheeler*	#64 · Jan-Erik Rath (Hamburg University of Technology, Institute of Aircraft Production Technology) Towards Automating Hand-Layup: A Preliminary Study on Robotic Draping of Woven Glass Fiber Fabric	#1225 · Frédéric Laurin (ONERA, Paris-Saclay University) Mechanical and electrical characterization of an aeronautical out-of-autoclave multi-functional composite structure containing solid state battery cells	#1146 · Paschalis Oikonomou (Department of Mechanical Engineering, Aristotle University of Thessaloniki) A parametric geometry framework to introduce variability in toroidal propeller designs
12:15		#253 · Qixiang Jiang (Univeristy of Vienna) Structural battery composites from multifunctional carbon fibre reinforced high performance polymer prepregs	#394 · Achyuth Ram Annadata (TUD Dresden University of Technology) Multi-matrix fiber-reinforced composite with shape memory alloys integrated through textile knitting technology	#1456 · Aravind Sasikumar (AMADE, Polytechnic School, Universitat de Girona, Campus Montilivi s/n, 17073 Girona, Spain) Advanced fracture and damage tolerance testing for liquid hydrogen composite tanks	#686 · Luka De Block (Ghent University) Compliance Free Mechanical Characterization of Single Carbon and Glass Fibers Through a Versatile Video-Extensometry Method.	#1218 · Olivia Gordon (The University of Auckland - Centre for Advanced Materials Manufacturing and Design) Plasma-Enhanced Carbon Fibre-Reinforced Thermoplastic Tapes Fabricated from Waste Plastic Blends	#1185 · Tarık Kara (Middle East Technical University, Department of Aerospace Engineering) Effect of Stacking Sequence on Carbon/Glass Hybrid Composites under Impact Loading	#1089 · Diwakar Singh (Department of Aerospace Structures & Materials, Delft University of Technology) Spatial correlation of fibre distributions in recycled carbon fibre composites using advanced image processing	◆*#956 · Seunghyeon Kang (Graduate School of Aerospace and Mechanical Engineering, Korea Aerospace University)* *Hydrogen-rich 3D-printed PEEK/PE gyroid radiation shielding composites for LEO satellite applications*	#360 · Moritz Lennartz (Institut fuer Textiltechnik, RWTH Aachen University) Human-Inspired Robotic Prepreg Sheet Layup using Knowledge Engineering from Manual Draping Demonstrations	#1009 · Shimeng Qian (Imperial College London) Multiphysics modelling of structural supercapacitors subjected to mechanical damage	#1296 · Angelos Ntaflos (Department of Materials Science & Engineering, University of Ioannina) 3R Composite Manufacturing Technologies: Vitrimer Prepreg Innovations and R2R Processing
12:30		#1387 · Ceren Yildirim (Sabanci University) Impact Damage Evolution and Compression After Impact Performance of CF/PEKK Laminates at Low, Room, and Elevated Temperatures	#785 · Tales de Vargas Lisboa (Leibniz-Institut für Polymerforschung Dresden e.V.) On the Natural Frequencies of MM-FRP Components with Polyurethane Soft Phases	#704 · Jiraphant Srisuriyacho (University of Bath) Experimental study on cryogenic bending properties and failure mechanisms of carbon fibre reinforced polymer down to 30K	#1128 · Abishek Baskar (Delft University of Technology) BIAXIAL TESTING APPARATUS AND SPECIMEN DESIGN FOR FIBRE POLYMER COMPOSITES	#1686 · Kim Sjödahl (Exel Composites Plc) Forward-thinking sustainability for composites	#59 · Nicole Motsch-Eichmann (Leibniz-Institut für Verbundwerkstoffe) CFRP-reinforced hollow aluminum struts for lightweight load-bearing pressure vessels	#1477 · Rishi Raj (EPFL) Development of surface sizing to revive the interfacial properties of recycled glass fibers with Polypropylene		#1513 · Philippe Olivier (ICA, University of Toulouse, UMR CNRS 5312) Mitigation of process-induced stress in unsymmetrical laminates via vitrimer relaxation	◆*#423 · Dominic Palubiski (Bristol Composites Institute)* *Manufacturing structural power devices; challenges and solutions of novel material systems* ◆*#845 · Hyunjoon Yoo (KAIST)* *Hybrid Lithium-Ion Thin-Film Batteries for Fast Ion Transport and High Areal Capacity*	#1028 · Dimitrios Fakis (Brunel Composites Centre, Brunel University London) Integrated Monitoring Solution for Enhanced Toroidal Propeller Safety
12:45–13:45	LUNCH											
13:45–14:15	2 KEYNOTES (rooms A & B)											
14:15–15:15	SESSION 3											
	Session →	**SS10 · Understanding and improving longitudinal compressive strength**	**SS29 · Multi matrix composites – design principles and processing technologies**	**SS07 · Cryogenic Testing and Material Characterisation**	**3.14 Micromechanics**	**SS26 · EcoComposites Cluster - Sustainability of composites in the transportation sector**	**SS06 · CirKle - Recycling materials for aircraft cabin components**	**2.1 Bio-Derived and Sustainable Composites**	**1.4 Defense**	**SS27 · Nature-Inspired Composites: From Natural Fibres to Biomimetic Structures**	**7.9 Maintenance and Repair**	**2.3 Matrix Materials: Polymers, Metals, Ceramics, Concrete, Geopolymers**
14:15		#626 · Mounika Chowdary Karla (University of Bristol) Thermoelastic stress analysis of translaminar compressive failure in carbon fibre-reinforced composites	#726 · Axel Spickenheuer (Leibniz-Institute für Polymerforschung Dresden e. V.) Manufacturing and Applications of Soft-rigid Multi-Matrix Fiber-Reinforced Plastics	#1652 · Nicolas Abouab (Arts et Métiers Institute of Technology (CNRS, Bordeaux INP, I2M, UMR 5295)) Multi-scale Damage Assessment of Composites under Cryogenic Conditions	#1333 · Pedro Camanho (Universidade do Porto) Micromechanical modelling of inelastic deformation of fibre-reinforced polymers accounting for strain gradients	#658 · Fernando Cepero-Mejias (Centre for Future Transport and Cities (CFTC), Coventry University) A MULTIDISCIPLINARY OPTIMISATION FRAMEWORK FOR FIBRE-REINFORCED COMPOSITE MATERIALS	#337 · Souvik Chakraborty (Dept. Sustainability Technologies, Institute of Lightweight Systems, German Aerospace Center (DLR),) Sustainable Composites for Cabin Monuments – Recycling of Resins with tailored FST Properties	#996 · Natalia Victoria Dos S (Dipartimento di Ingegneria Chimica, dei Materiali e della Produzione Industriale (DICMaPI) - Università di Napoli Federico II) Enzymatic Surface Treatment to Enhance Interfacial Performance of Hemp Fibers in PLA Biocomposites	#993 · Stavros Tsantzalis (Hellenic Air Force Academy) Investigation of Dorsal Fin Structural Failures in single engine trainer aircraft: Material Degradation, Adhesive Performance, and FEM-Based Repair Optimization	#612 · Maria Kashtalyan (University of Aberdeen) Bio-inspired Metal-Composite Joints with Stiffness Gradients	#1505 · Spyridon Psarras (University of Patras) Active Learning–Based Optimization of Stepped Composite Repairs	#1382 · Ahmad Awdi (CEA Marcoule) Multi-scale quantitative analysis of potassium geopolymer: from macro to nano scale
14:30		#665 · Yousef Rifai (University of Bristol) The longitudinal compressive response of glass/carbon hybrid composites with different modulus carbon fibres	#1209 · Dmitry Ivanov (University of Bristol) Multi-matrix composites: application rationales and manufacturing strategies	#1180 · Serafín Sánchez-Carmon (Universidad de Sevilla) CHARACTERISATION AT ROOM AND LOW TEMPERATURE OF CARBON/EPOXY MATERIAL AFTER LONG-TERM CRYOGENIC EXPOSURE	#1197 · Christian Breite (Department of Materials Engineering, KU Leuven) Physics informed geometric generator for unidirectional fibre reinforced composite microstructures with periodic boundaries	#231 · Fernando Ramos Saz (AIMPLAS) Thermoplastic Pultrusion of Bio-PA6 Hybrid Carbon Fiber Laminates with Enhanced Multidirectional Performance	#662 · Jens Bachmann (DLR German Aerospace Center) Potential environmental impacts of production and recycling for a representative state-of-the-art aircraft cabin structure	#501 · Laura Aliotta (University of Pisa) Investigation of Bio-PA11/Coconut Fiber Composites for additive and injection molding applications through Ludovic® Based Process Optimization	#485 · Daniel Barros (Fibrenamics - Institute for Innovation in Fiber and Composites Materials) Hybrid Reinforcement Structures for Optimised Ballistic Performance	#1453 · Carlos Ivan Cardona Ga (Luxembourg Institute of Science and Technology) HIERARCHICAL DESIGN PARAMETERS DRIVING THE STRAIN EVOLUTION IN BAMBOO TECHNICAL FIBERS	#511 · David May (Faserinstitut Bremen e.V.) Repair of Thermoplastic Composites with Customized AFP Patches: Analysis of the Heat-Affected Zone and Its Influence on Repair Quality	#697 · Johann Faust (TUD Dresden University of Technology) Experimental characterisation and modelling of radiation transfer in UV-reactive fibre-reinforced composites
14:45		#774 · Cameron Woodgate (Department of Chemistry, Imperial College London) Linking Carbon Fibre Microstructure to the Intrinsic Compressive Performance of Carbon Fibre Composites	#615 · Lorenzo Di Marco (Politecnico di Milano Department of Chemistry, Materials and Chemical Engineering "Giulio Natta") Delamination and Repair in Epoxy-Vitrimer Multi-Matrix Composites	#1192 · Elena Correa Montoto (Universidad de Sevilla) INTERLAMINAR AND INTRALAMINAR TOUGHNESS OF CARBON/EPOXY MATERIAL AFTER LONG-TERM CRYOGENIC EXPOSURE	#813 · B.A. Wani (INDIAN INSTITUTE OF TECHNOLOGY TIRUPATI) Fatigue Life Estimation of Cross-ply CFRP Composite Laminates: An Experimental & Computational Micromechanical RVE Approach	#1688 · Florian Part (Institute of Waste Management and Circularity, Universität für Bodenkultur Wien) Sustainable and recyclable thermosets for the automotive, aerospace sectors and beyond	#601 · Cedric Tschentscher (Institute of Polymer Materials and Plastics Engineering, Clausthal University of Technology) Recyclable Sandwich Components - Using Hybrid Vitrimers for Disassembly	#1269 · Sophie Bistac (Université de Haute Alsace - LPIM) Surface characterization of agro-industrial by-products for composites applications	#571 · David McDonogh (Von Roll Schweiz) Flexible composite protection for a dynamic world	#1580 · Yugal Kishor Sharma (Department of Mechanical Engineering, Malaviya National Institute of Technology Jaipur) Sustainable Jute, Coarse Sheep Wool and GGBFS Reinforced Epoxy Composites: Fabrication via VARTM and Performance Evaluation	#745 · Alexander Payne (University of Strathclyde) Interfacial Performance of Vitrimers with Glass Fibres: A Comparative Study with Insight into Post-Healing Adhesion Behaviour	#628 · Lissy Flechsig (Leibniz-Institut für Polymerforschung Dresden e.V.) Novel Approach for an open-pore micro-structured interphase in carbon concrete composites
15:00		#800 · Gursahib Singh Bhatia (Trinity College Dublin) INVESTIGATION OF COMPRESSIVE FAILURE OF NOVEL HYBRID BORON-CARBON FIBRE REINFORCED COMPOSITES OBSERVED IN-SITU BY COMPUTED TOMOGRAPHY	#672 · Morgan Renard (Leibniz-Institut für Polymerforschung Dresden e. V.) Online Spinning of TPU/GF Hybrid Yarn for Thermoplastic Multi-Matrix Fiber-reinforced Plastics	#885 · Anna Volpi (Università degli Studi di Enna "Kore") Experimental Characterization of the Relationship Between Crack Network Parameters and Permeability of Composite Coupons after Cryogenic Thermal Cycling	#217 · Sergio Horta Muñoz (Universidad de Castilla-La Mancha) Influence of relative fibre geometry on crack initiation and growth in unidirectional composites under transverse and shear loads	#735 · Burak Akdeniz (Aerospace Structures and Materials Department, Faculty of Aerospace Engineering, Delft University of Technology) (Elasto)capillary Effects in the Slurry Impregnation Method in for Manufacturing Unidirectional Thin Ply Thermoplastic Tapes	#1106 · Katharina Haag (Fraunhofer Institute for Manufacturing Technology and Advanced Materials IFAM) Closing the loop: full recyclability of composite structures for cabin interior through adapted vitrimeric polymers meeting the application specific requirements	#321 · Lars Wollert (ITA RWTH Aachen University) Use of bio-based and recycled composites in sports and leisure products	◆*#413 · Vincent Pichot (French-German research institute of Saint-Louis, ISL, 5 rue du Général Cassagnou)* *Ageing effects in transparent protective systems*	#1863 · Clare Garing (KU Leuven) ELUCIDATING THE MECHANISM BEHIND ENHANCED FLAX FIBRE MECHANICAL PERFORMANCE AFTER CYCLIC MOISTURE CONDITIONING	#1460 · Sara Keiko Murase (Eurecat, Technological Center of Catalonia – Polymeric and Composite Processes Unit) Microcrack repair in vitrimer-based composite matrices: A pathway to durable and reprocessable structures	#407 · Jean-Charles Malenfant (SAFRAN CERAMICS) Behaviour of unidirectional Oxide CMC for aeronautical applications
15:15–16:30	POSTER DISCUSSION (+ COFFEE BREAK)											
16:30–18:00	ESCM GENERAL ASSEMBLY											

ECCM22 — WEDNESDAY (08:00-18:00) — PRELIMINARY TECHNICAL PROGRAMME (version of 7 June 2026)
★ = Italic = Short oral (7 min) · plain = Full oral (15 min) · - Minor changes to the programme may occur.

Time	Activity	A	B	C	D	Forum	M1	M2	M4	M5	Balder	Odin
08:00–08:45	**PLENARY 3**											
09:00–11:00	**SESSION 1**											
09:00	Session →	**SS10 - Understanding and improving longitudinal compressive strength**	**SS19 - Fatigue and Damage Mechanics of composite and composite structures**	**SS22 - Durability of polymers and fibre reinforced polymer composites**	**5.2 Additive Manufacturing** ★0136 - Gédric Cisonne (Polytechnique Montréal, Laboratory of Multiscale Mechanics) Development of a Digital Twin for Additive Manufacturing Using Kalman Filtering and In-Situ Monitoring	**3120 - History of composites** ★0248 - Ignacio Verpoest (Composite Materials Group KU Leuven (Belgium)) The history of Composites: an introductory overview	**7.11 Recycling, Remanufacturing, and Circular Economy** ★476 - Elke Kraft (Fraunhofer Research a.s.) Performance-Preserving De-milling of Overmolded Sections from Organosheets using Ferro-Magnetic Particles and Induction Heating	**2.1 Bio-Derived and Sustainable Composites** ★1262 - Alberto Jiménez Suárez (Universidad Rey Juan Carlos) Multifunctional and sustainable hybrid composites based bio-epoxy reinforced with basalt fiber and short recycled carbon fiber	**3.13 Lightning Strike and Fire Safety** ★0051 - Muhammad Ali (Brunel Composites Centre) Capturing Localised Electro-Thermal Effects by Incorporating Spatially Varying Property Fields in the Simulation of Lightning Strike on Composite Structures	**1.8 Renewable Energy (e.g. Wind, Solar)** ★1117 - Pierre Gerard (ARKEMA) Influence of Thermoplastic Composite Blades on Structural Damping and Load Reduction in Wind Turbines	**T3 - Dynamic, Impact & Crash** ★720 - Muhammadali Shirinbaya (Arts et Metiers Institute of Technology, CNAM, CNRS, PIMM) Dynamic Post-Fatigue Response of Composite Materials: A Multi-Scale Damage Analysis	**6.2 Energy Storage and Harvesting** ★1365 - Kaoen Al-Ernawi (Chalmers University of Technology) Multifunctional structural battery with the all-fibre structural battery
09:15					★326 - Yushi Zhang (The University of Manchester) Design of Lightweight Hollow Structures using Natural Fiber-Reinforced PLA Composites for Engineering Applications	★227 - Christophe Bindreiy (Nantes Université, Centrale Nantes, GeM, UMR CNRS 6183) Historical Perspective on Modeling of Processing of Polymer Composites	★1158 - Lini Tampere (Estonian University of Life Sciences) Polymer-cotton hybrid mycelium composites for semistructural applications	★273 - Benoit Vieille (Groupe ISAE-ENSMA Institut Pprime) Meso-Structure-Based Thermomechanical Modelling of Carbon Fibre-Reinforced Thermoplastic Laminates Subjected to Kerosene Flame: Porosity Nucleation, Growth and Mechanical Consequences	**T1 - Durability and Ageing** ★1384 - Gülnur Bayer (MKTVA Tolaleks A.Ş.) Development of a Lightweight, Impact-Resistant, and Innovative Composite Photovoltaic Module for Vehicle-Integrated Applications	★1397 - Xicong Xu (School of of Aeronautics, Northwestern Polytechnical University) High-Speed Projectile Impact Damage and Finite Element Simulation of 2D-SiC/SiC Composites	
09:30		★1050 - Zongshan Li (Beihang University) Exploration and Reflections on Compressive Failure of Composite structures	★440 - Nicik Kusic (FAU Erlangen-Nürnberg, LSTM, Germany) Fatigue Life Prediction of Adhesively Bonded Joints with polyester and vinyl-ester matrices: Accelerated laboratory vs. natural ageing	★1220 - Alban Bakin (Dassault Aviation) Advanced modelling of composite materials for aerostructures: industrial state-of-the-art and challenges	★823 - Jesper Inwaldig (Aarhus University) Numerical Experimental Print-Scale Investigation of PA11 Short-Fiber Composites in SLS	★275 - Veronique Michaud (EPFL STI IMX LPAC) Dibas, alfas, farfas: The crucial role of composites in sports	★1002 - Yiwai Zhang (IKU Leuven) Fabrication of long glass fibers from thermoset epoxy composites by a mild catalytic thermo-chemical recycling method	★1151 - Behnam Ashrafi (National Research Council Canada) Silver-based molecular inks for lightning strike protection of carbon fiber-reinforced polymer composites	★1028 - Bikshal Bikash Kagyung (IIT Bombay) Effect of Lightning Strike Damage on Reinforced Polymer Laminates Subjected to Lightning Strikes using Conductive Carbon Black and Electrifying Technique	★820 - Anastasia Lartseova (Technical University of Denmark, Department of Wind and Energy Systems) Hemp-based composites design for a 12.6 m wind turbine blade	★928 - Mohamed Amine Ajeil (ESTACA Laval, LAUM - Maine University, LAUM* - ENSI - University of Sfax) Experimental investigation of the vibrational characteristics of 3D printed biocomposite sandwich beams with periodic cores	★122 - Zhuo Shu (UNSW) Fire-resistant polymer electrolyte for structural energy storage composites
09:45		★512 - Dantz Sashikan Dhaping Mohler Leh, Faculty of Aerospace Engineering, Delft University of Technology Flax Composites with Improved Interfacial and Compressive Behaviour Through Bacterial Calcium Carbonate Biomineralization	★108 - Chunbing Yu (School of Aeronautics, Northwestern Polytechnical University) In-plane shear progressive damage analysis of multiaxial three-dimensional woven composites	★498 - Christina Scheffer Sotiriu (Institute of Polymer Research Dresden) Thermographic Investigation of Fatigue Failure in Composites - Mechanisms, Tensile Strength Degradation and Residual Analysis	★609 - Hendrik Ostrowski (Aarhus University) X-ray μCT microstructures correlated with mechanical properties in short-fibre-reinforced SLS printed composites	★295 - Matthew Wevers (KU Leuven, Department of Materials Engineering) The history of nondestructive testing (NDT) on fibre reinforced polymer composites	★458 - Eud Sarfo-Tampere (University) Combined resizing and binding process for recycled carbon fibre mats for improved composite properties	★701 - Shaghayegh Elahi (1 Faculty of Built Environment, Tampere University) Shear-based molecular inks for lightning strike protection of carbon fiber-reinforced polymer composites	★1195 - Lourdes Blanco Salgado (Aixam Technology Center) Multi-Functional Optical Sensor Systems for Process and Structural Health Monitoring in Smart and Sustainable Wind Turbine Blade Components	★1157 - Hao Peng (Aramex University) Mechanical Interlocking Design of Wavy Metal Sleeves to Enhance Fatigue Performance of Composite-Metal Joints in Wind Turbine Blade Roots	★1372 - Hiroyuki Hamada (Kyushu University) Fiber-Fluid Framework	★1378 - Odysseas Kakavelidis (Department of Aeronautics, Imperial College London) Numerical and Experimental Study of Lightning Strike Protection in carbon aerogel-modified carbon fibre electrodes
10:00		★750 - Guillaume Senn (University of Texas at Arlington) Computer Graphics-Based Generation of 3D CFRP Micromodels and the Effect of Fiber Misalignment Phase Angle on Compressive Strength	★1307 - Lucio Maragoni (Department of Management and Engineering, University of Padova) Effect of defects on fatigue crack initiation in carbon/epoxy laminates	★1424 - Alice Mija (Université Côte d'Azur) High-performance biobased thermosets containing dynamic covalent bonds	★67 - Antonios Stamopoulos (University of L'Aquila, Department of Industrial and Information Engineering and Economics) Progressive Reinforcement Effects of Continuous Carbon Fibre Layers in PETG-Based 3D-Printed Composites	★592 - Hans Lilholt (Wind Energy Materials and Components Division, Department of Wind and Energy Systems, Technical University of Denmark) No wind energy without composites: The early years as seen from Denmark	★1722 - Omar Elbeaney (University of Bath) Development of Contrapuntal CNT Fibers For Reducing Joule Heating and Shock Wave Damage under Lightning Strikes	★1244 - Su Jeong Heo (Pusan National University) Development of Electrospun Nanofiber Membranes Containing Graphene Nanoplatelets for Enhanced Lightning Strike Protection	★1252 - Wanbo Li (Ecole nationale supérieure d'arts et métiers - LAMPA) Numerical and Experimental Study of Low-Velocity Impact Response in Composite Laminates via a Dynamic Phase-Field Framework	★1382 - Ayoub Sherafat (Durham University) Discontinuous Electrolytes for Structural Supercapacitors	
10:15		★466 - Pierre-Yves Mechin (Southern Spain) Understanding Compressive Instability Mechanisms in High-Modulus Carbon Fibre Systems	★1208 - Prabhjot Singh (Department of Textile and Fibre Engineering, Indian Institute of Technology Delhi) Synergistic Effects of Nanofiller Reinforcement and Surface Treatment on the Flexural Fatigue Behaviour of 3D Woven Core based Metal Faced Sandwich Composites	★1385 - Goren Yildirim (Sabanci University) Impact of Environmental Conditions on the Fracture Toughness of CF/PEKK Composites and Their Adhesively Bonded Joints for Aerospace Applications	★832 - Dominik Leubecher (1) Process-Relevant Relaxation and Reptation Times in Thermoplastics for Large-Scale Additive Material-Extrusion A Thermorheological Characterization	★830 - Yenli Sevilla (KU Leuven, Department of Materials Engineering) The history of fibre-hybrid composites	★948 - Winston Lindpointer (Technische Universiteit Delft) Multi-scale Computational Design of Wyrsalloen-Based Hierarchical Composites	★◆0490 - Julie Vecendaire (AGA Aixam Normandie, Univ-Rouen Normandie, CNRS, Normandie Univ, GPM UMR 6634) Comparative study of the flexural behavior of carbon fibers reinforced PEEK laminates with different tip-ups after exposure to a kerosene flame ★1507 - Geoffrey Neale (Centre for Materials, Faculty of Engineering and Applied Sciences, Cranfield University) Lightning strike damage suppression in copper x-pinned carbon fibre composites	★1382 - Sabrina Khammassi (UTTOP Tarbes) Crashworthiness capability of bio-scalled hybrid wood–composite tubes under axial crushing: Influence of spiral-wound architecture and fiber material orientation	
10:30		★522 - Kristoffer Herklotsdy (Department of Industrial and Materials Science, Chalmers University of Technology) Compressive strength prediction with a micromechanics-inspired material model	★404 - Dennis Gläsmann (Isarsburg University of Technology) Effects of Matrix Choice and Environmental Factors on the Fracture Toughness, Damage Progress and Fatigue Lifetime of GFRP	★705 - Andrejs Kraulitis (Latvia University of Life Sciences and Technologies (LBTU)) Decoding Environmental Drivers of Glass Fiber Dissolution in Composite Materials	★573 - Aheud Shaveli Charkesh (Ürün Üniversitesi Brunswi (AUB)) IN-SITU PROCESS MONITORING AND RESIDUAL STRAIN DETECTION IN 3D PRINTING VIA OPTICAL FIBER SENSING	★1281 - Alain Bourmaud (Université Bretagne Sud) From Egyptian Salt to Modern Composites: The Sustainable Journey of Natural Plant Fibres	★1137 - Shiro Hishammasharbini (KTI - Flexible Technology Group, Faculty of Mechanical Engineering and Thuringian Center of Innovation in Mobility, Technische Universität Ilmenau) Beyond Processing Parameters: Strip Alignment as the Key to High-Performance Recycled CFRTP via Direct Compression Moulding	★139 - Clare Garting (BU Leuven) Elucidating the mechanisms behind enhanced flax fibre composite mechanical performance after cyclic moisture conditioning	★◆0214 - Hesam Badri (Brunel Composite Centre) Anisotropic AC/DC Electrical Conductivity Mapping of CFRP: From Single-Fibre Characterisation to Multi-Scale Electro-Thermal Modelling Using a Novel multi-Probe Method ★◆0485 - Roland Pethirey (Department of Polymer Engineering, Faculty of Engineering, Budapest University of Technology and Economics) High-performance, conductive and sustainable PAA-based filaments for 3D printing with reclaimed carbon fibres and conductive fillers	★1545 - Christian Hill (Institute of Lightweight Engineering and Polymer Technology, TUD Dresden University of Technology) Dual Tailoring of Fiber and Matrix Architecture for Failure-Resistant High-Speed Composite Impellers	★1522 - Fatemeh Mokhtari (Department of Materials Engineering, KU Leuven) Polydopamine-Coated BaTiO3 Nanoparticles and Annealing Effects on the Piezoelectric Response of Composite Nanofibers at High-Frequency
10:45		★932 - Takuya Nishioka (The University of Tokyo) Compressive strength of self-healing vinitrep nanopolmec Effect of the resin ductility and repairability	★364 - Arvind Pramanant (Department for Sustainable System Engineering (INATECH), Faculty of Engineering, University of Freiburg, Germany; Fraunhofer Institute for Solar Energy Systems, Freiburg, Germany) Sustainable Composites for Lightweight Structures: Life Cycle Assessment and Circularity Evaluation of Functional Materials (EPAS, University of Freiburg.) Fatigue life prediction for polymer matrix composites using fracture fatigue entropy approach	★504 - Sandeep Kumar Gantela (Université Bourgogne Europe, DRIVE) Effect of Hygrothermal Conditioning on Mechanical Behavior of Recycled Carbon Fiber Reinforced ABS Composite Moulds: the environmental footprints of flax fiber reinforced composite structure	★1149 - Iulia Franciscu (Fachhochschule Nordwestschweiz) Mechanical Performance and Durability of Recycled Short Glass Fiber Reinforced ABS Composite Moulds: Material Characterization and Process Simulation	★◆0125 - Giovergiouyage Giusto (CIRA (Italian Aerospace Research Center)) The latest developments in grid structures for space applications	★480 - Maria Modestou (R-NanoLab, School of Chemical Engineering, NTUA) Recycling of Glass Fibers through Supercritical Solvolysis: Kinetics analysis and characterization	★413 - Natalia Sofia Guevara - (Shaping Matter Lab, Faculty of Aerospace Engineering, Delft University of Technology) Advancing biobe sustainability: erosion performance of flax fibre composites	★027 - Patrik Fernberg (Department of Engineering Sciences and Mathematics, Luleå University of Technology) Wetbud Modelling of Anisotropic Dielectric Strength in Unidirectional Glass Fibre Composites		★◆0283 - Qiangbin Xiao (Beihang University) Experimental Study on Damping Prediction Method for Unidirectional Composites Based on Multi-Scale Relaxation Simulation	★359 - Zhaoo Zhao (Tohoku University) CFRP Hinge and Multilayer Piezoelectric Sensor for Vibration Energy Harvesting and Impact Damage Detection
11:00–11:30	**COFFEE BREAK**											
11:30–12:45	**SESSION 2**											
11:30	Session →	**SS10 - Understanding and improving longitudinal compressive strength**	**SS25 - Sustainable Composites Engineering: Innovations from a Doctoral Training Centre**	**SS11 - Advanced Composite Materials and Structures: Multifunctional Design, Damage Diagnostics, Testing, and Modeling**	**3D.1B - Composite Materials for Hydrogen Economy**	**1.2 Automotive, Rail, and Ground Transportation**	**2.8 Foams, Cellular and Lattice Materials**	**T5 - Inline Process Monitoring, Quality Control & Multiphysics-Based Experimental Testing**	**5.8 Forming and Stamping**	**5.10 Machining**	**3.16 Multiscale Modelling**	**6.4 Integrated Smart Devices, Structural Integration, & 2 EMI Shielding, Functionalities**
		★824 - Deepak Sharma (School of Mechanical and Aerospace Engineering, Nanyang Technological University) Bio-Mediated Longitudinal Reinforcement in Architected Mycelium Composites	★1228 - Jenny Banks (University of Bristol, ACC) Continuous Recycled Carbon Fibre: Influence of Fibre-to-Preform Processing on Mechanical and Interfacial Properties	★1646 - Cary Atkinson (University of the West of England Bristol) Tuar-Inspired Strain Amplification Layers for Composite Structures	★389 - Thés Boumard (CETIM) Influence of decompression rate and cyclic hydrogen exposure on mechanical and transport properties of type IV hydrogen tank liner materials	★1241 - John Montesano (Composites Research Group, University of Waterloo) Coupled high-pressure resin transfer molding process and structural impact simulations for automotive composites	★1345 - Alessandra Lingua (ETH Zürich, Institute for Building Materials) Mapping damage in composite lattices for the design of tough architected materials	★880 - Carlos González (IMDEA Materials / Technical University of Madrid) Smart Digital Twins for Composite Manufacturing	★1725 - Kalliopi-Artemi Kalteremidou (Vrije Universiteit Brussel) Thermomechanical shear characterization of thiol/PP composite laminates under thermoforming conditions: from experiment to simulation	★1451 - Alexander Brueckelen (Hamburg University of Technology) Empirical model for predicting surface roughness in CERP during peripheral milling with load and tilt angles.	★1703 - Islam Ben Hadj (UPX) Orthogonal Cutting of Unidirectional CFRP Composites: Experimental Data and Numerical Modelling	★954 - Charles Castille (University of Tokyo, Department of Aeronautics and Astronautics) Development of High-Conductivity Phase Change Material (PCM) Composites for Passive Thermal Management and Advanced Manufacturing Integration	★998 - Serena Sacchet (University of Trento, Department of Industrial Engineering) Development of a Multi-Conductivity Phase Change Material (PCM) Composites for Passive Thermal Management and Advanced Manufacturing Integration
11:45		★807 - Ryoji Nishi (Nihon University) Effect of deviatoric angle on axial compressive strength of fibrous composites	★1288 - Yutin Clark (University of Bristol) Accurate Filament Winding Simulation for Hydrogen Tank Applications	★846 - Álvaro Vaz-romero (Universidad Carlos III de Madrid) A new geometry to evaluate the strain rate sensitivity of Mode II Interlaminar Shear Strength in CFRPs	★318 - Jan Cendi-Weiher (Dresden University of Technology) Biputrescible Composites for Hydrogen Storage: Investigating Damage and Healing in Thermoplastic- and Vitrimer-Based Composites by Cyro-Permeability Measurements	★1149 - Dramarelle Maccaferri (University of Bologna) Composite lamitate modification with elastomeric nanofibers for improved toughness: impact tests on Automotive composites	★1167 - Michal K. Budzik (Aarhus University) Elastic-plastic response of a reinforced closed-cell foam under uniaxial loading	★1149 - Christian Ettinger (Profactor GmbH) Method for Inspecting the Inner Surface of Large Carbon Fibre Composite Structures	★767 - Mael Minon (Nantes Université, Ecole Centrale de Nantes, CNRS, GeM, UMR6183) Correlation between the local criticality and porosity and the mechanical performance of the welded interface from reinforced lattice structures	★1703 - Islam Ben Hadj (UPX) Orthogonal Cutting of Unidirectional CFRP Composites: Experimental Data and Numerical Modelling	★89 - Bruno Simoes Barbi (INASTA-PP - IBDL - SAFRAN) Modeling of Dissipative Mechanisms Related to Fatigue of 3D Woven Composites	★224 - Laura Simonini (University of Trento) Novel multifunctional sandwich composites for thermal-management and mechanical performance
12:00		★475 - Vincent Kerrein (Univ. Bretagne Sud) Understanding premature compressive failure in high-modulus PAN-based carbon fibre composites: assessing the compressive behaviour of carbon fibres by nano-indentation and micro-pillar compression	★763 - Kieran Gumbs (UoB/NCC) Development and Testing of Cure Material Homogenisation Technique for Large Scale Resin Infusion Simulations	★862 - Zhengfang Ji (Northwestern Polytechnical University) Gradient design of CF prepregs for multifunctional composite laminates with excellent electromagnetic wave absorption and mechanical performances	★1260 - Pau Miquel-Roura (University of Girona) A NOVEL COUPLED MECHANICAL-PERMEABILITY APPROACH FOR PREDICTING HYDROGEN LEAKAGE IN UD COMPOSITE TANKS	★768 - Ribem Ferreira (INEGI - Instituto de Ciência e Inovação em Engenharia Mecânica e Engenharia Industrial) Structural Design and Manufacturing Validation of a Fiberglass-Reinforced Composite Bus Chassis	★1367 - Hadi Mozafari (Aarhus University) Computational analysis of the crushworthiness of pristine and recycled 3D-printed fiber-reinforced lattice structures	★914 - Per Hallander (Saab AB) Forming thermoplastic composites with fluid cell press	★222 - Isela Cañavó (Faculty of Mechanical engineering, ETs) Influence of Continuous Wave and Pulsed Mode Fiber Laser Parameters on Machining Quality of CFRP Composites	★947 - Rohin Vahedian (UAH) Predicting longitudinal strength of unidirectional composites using a discrete damage model within full-field FFT-based simulations	★851 - Ishban Cheng (National Key Laboratory of Strength and Structural Integrity, School of Aeronautics, Northwestern Polytechnical University) Design and analysis of hybrid radar absorbing structures realized by carbon fiber arrays
12:15		★412 - Emmanuel Baringer (Université Paris-Saclay, CentraleSupélec, ENS Paris-Saclay, CNRS, LMPS - Laboratoire de Mécanique Paris-Saclay) Modeling of kinking in CFRPs: a multiscale competition between damage mechanisms	★1469 - Jordan Forbes-Thomas (University of Bristol) Failure of filament wound hoop tubes by internal open-ended pressure testing	★◆0479 - W.U (Department of Aerospace Science and Technology, Politecnico di Milano) Fatigue Testing of Post-Buckling Mode Evolution in Multi-Stable Composite Panels with Metallic Stringers	★1430 - Giorgia De Pano (Department of Industrial Engineering, University of Salerno) A comprehensive study of epoxy nanocomposites for lightweight hydrogen storage tanks: from processing to gas permeability	★1207 - Jinping Hou (Zhuzhou Times New Materials Technology Co Ltd) Development of a mono-composite leaf spring for light hydrogen trucks using Finite Element Method	★1249 - Maximilian Lang (Technische Universität Ilmenau) Predicting Fabric Permeability from Yarn Architecture	★1462 - Martin Müller (Leibniz-Institut für Verbundwerkstoffe) Simulation-Driven Process Development for Multifunctional Manufacturing of Thermoplastic Aircraft Door Surrounds	★1584 - Hendrik Möllers (Clausthal University of Technology) Mechanical properties of thick laminates using multiple different epoxy resin systems	★734 - Buzchen Zheng (Ghent University) In-Situ Mechanical Characterization of 2D Interlock Reinforcements Using a Virtual Fiber Approach	★1216 - Muhammad Ogulcan Yeşil (Istanbul Technical University Aerospace Research Center) Screen-Printed CNT/CNC Sensors Integrated into 3D Orthogonal Woven Composites for Areal Strain Mapping and Impact Localization
12:30		★1226 - Joshua Donoghue (University of Auckland) Measurement and prediction of the development of mechanical properties of a flax-epoxy composite during the curing process	★1238 - Jack Davies (University of Bristol/National Composites Centre) Advanced Non-Linear Modelling: Addressing Material Variability in Large Wind Turbine Blade Structures	★715 - Gu-Tae-eeoto (Department of Aerospace Engineering, Tohoku University) Fatigue Life Prediction of Adhesively Bonded Joints Using Synchrotron Radiation X-ray CT (with DVC) and Raman Spectroscopy	★540 - Roman Bock (German Aerospace Center (DLR)) Permeability analysis of adhesives for CFRP hydrogen tank development	★1194 - Paloma Rodriguez Santa (University of Bath) Testing Bars Through Performance of Thermoplastic Composites for eVTOL Battery Enclosures	★◆1341 - Elizabeth Veneziani (ZBT - Zentrum für Brennstoffzellen Technik GmbH) Development of a multi-physics simulation workflow for production of highly filled polymers used in conductive foil production for energy applications ★◆0111 - Manuel Littig (German Aerospace Center (DLR)) Data Assimilation of PEKK through integration of in-situ microparticles	★◆0029 - Shishir Kumar (INDIAN INSTITUTE OF TECHNOLOGY KANPUR) Modeling of fracture toughness: free cohesive fatigue damage model for improved crack-front tracking and damage prediction in laminated composites	★1139 - Sandhya Mohanty (Technical University of Denmark) Reliable Binder-Stabilised Preform Manufacturing: Binder Distribution and Processing Conditions	★670 - Célia Cuenot (Airbus Atlantic) In-situ MONITORING OF THICKNESS EVOLUTION IN CARBON/PA6X LAMINATES DURING VBO CONSOLIDATION	★678 - Minghe Cui (Beihang University) Machining Deformation Zone Containing a Single Fiber Toe for Characterizing Effective Properties of Plain Woven Composites	★201 - Robert Oshed Pope (Bristol Composites Institute) Embedding pulsating heat pipes in carbon composites for advanced thermal management
12:45–13:45	**LUNCH**											
13:45–14:15	**2 KEYNOTES (rooms A & B)**											
14:15–15:45	**SESSION 3**											
14:15	Session →	**SS01 - Delamination and debonding in composite materials and structures**	**SS23 - Computed tomography**	**SS09 - Methods and tools to support the certification by analysis of composites structures**	**5.2 Additive Manufacturing**	**2.6 Nanocomposites**	**1.9 Space & U.S Marine**	**2.1 Bio-Derived and Sustainable Composites**	**3.9 Fracture and Damage**	**4.5 Non-Destructive Evaluation & 4.1 Acoustic Emission and Ultrasonic Methods**	**2.7 Fabric Mechanics and Simulations**
		★1485 - Christian HOCHARD (LMA-AMU) Influence of the matrix degradation on the fiber direction compressive Strength	★393 - Clément Prunier (Université Marie et Louis Pasteur, SUPMICROTECH, CNRS, Institut FEMTO-ST) Analysis of Moisture-Induced Deformation in Hybrid Bio-Based Yarns via Bin-Controlled X-Ray Tomography	★◆0090 - Diego Cardoso (INEGI) A Physics-informed Framework for Modelling As-Manufactured Variability in Automated Fiber Placement	★1427 - Florian Hoger (TU Wien, Institute of Materials Science and Technology) Characterization and Improvement of Fiber-Matrix Adhesion in Lithography-Based Additive Manufactured Composite Materials	★1712 - Tayyab Khan (National Graphene Institute and Henry Royce Institute, The University of Manchester) Graphene-enhanced Thermoplastic and Elastomer Nanocomposite Systems for High-end Solvent and Gas-Barrier Applications	★1204 - Ragnar Bjornson (University of Bristol) Effects of galactic cosmic radiation on the mechanical performance of thin high-strain PEEK composites for space applications.		★◆0312 - Sabrina Asenbeimer (RTH Royal Institute of Sweden) Investigation of moisture influence during manufacturing of artificial bio-based cellulose nanofibril (CNF) fiber/epoxy composites ★◆1120 - Pedro Rosa (Institute for Polymers, Composites and Biomaterials, National Research Council) Brewers' Spent Grain Hydrochar as a Circular Filler for Thermoplastics and their Flax-Fabric Composites	★1010 - Angelika Christoforaki (Delft University of Technology) In-plane fatigue crack growth of fiber-polymer composites based on a novel specimen design	★◆0647 - Dimitrios Apostolakis (TU.Delft) The Tow Fiber: Processing-Structure-Mechanics Relationships in Continuous Natural Fiber Thermoplastic Tapes ★◆0452 - Sidharth Amardeep Kota (Bernal Institute (Composites), School of Engineering, University of Limerick) Interfacial Characterisation of Lignin-Derived Carbon Fibers for Sustainable Composite Applications	★1161 - Yuancheng Tang (Queen Mary University of London) Phase field prediction on the micro-mechanical behaviour of composite materials subjected to transverse compression	★936 - Marta del Carmen Serna Gimeno (University of Castilla-La Mancha) Deviation from the ideal shear strain state of a FRP under biaxial tension-compression test and standard methods	★696 - Filippo Mannino (IPFL, Composite Mechanics Group (GR-MeC)) Non-Linear material properties and classical laminate theory
14:30		★485 - Hwei-Lino Khoo (Imperial College London) Understanding how fibre hybridisation changes FRP compressive failure behaviour via computational modelling.	★777 - Ayshan Sofiamahdi (York University) Full-Field Strain Analysis of Additively Manufactured Structures Under Compression Using Digital Volume Correlation	★1101 - Esben Dinker (NIGG) A Unified Phenomenological Model for Elastoplastic In-Plane Shear Response in Composite Materials	★398 - Sarosh Adeel (University of Dalaware) 2-Penetrator: A Strategy for Stronger Interlayers in Composite 3D Printing	★1474 - Gahl Orhan Senol (Sabanci University) Industrial-Scale Multiscale CNT Integration to Tailor Temperature-Dependent Delamination Resistance in Aerospace CFRPs	★191 - Gökhan Sancak (Bristol Composites Institute, School of Civil, Aerospace, and Design Engineering, Faculty of Science and Engineering, University of Bristol) Shielding of Carbon Fibre Polybenzoxazine Polymer Composites with PODS Incorporation and HDPE Sandwich Structures Against Space Radiation		★◆0647 - Dimitrios Apostolakis (TU.Delft) The Tow Fiber: Processing-Structure-Mechanics Relationships in Continuous Natural Fiber Thermoplastic Tapes ★◆0452 - Sidharth Amardeep Kota (Bernal Institute (Composites), School of Engineering, University of Limerick) Interfacial Characterisation of Lignin-Derived Carbon Fibers for Sustainable Composite Applications	★613 - Yuancheng Tang (Queen Mary University of London) Phase field prediction on the micro-mechanical behaviour of composite materials subjected to transverse compression	★936 - Marta del Carmen Serna Gimeno (University of Castilla-La Mancha) Deviation from the ideal shear strain state of a FRP under biaxial tension-compression test and standard methods	★696 - Filippo Mannino (IPFL, Composite Mechanics Group (GR-MeC)) Non-Linear material properties and classical laminate theory
14:45		★539 - Arthur Montanari (ONERA) An experimental and numerical investigation of 3D woven structures failing by kink-band propagation	★589 - Karl Arvidsson (Luleå University of Technology) Damage Characterization of Composite Laminates through X-Ray Computed Tomography and Machine Learning-Based Defect Characterization	★1275 - Ole Thoonsen (Bristol Composites Institute, University of Bristol) Certification by Analysis of Large Composite Structures – Vision or Delusion?	★302 - Martin Boller (Johannes Kepler University Linz) Anisotropic Hierarchical Structures Based on Bone Architecture: Overlap-Controlled Toughening via Additive Manufacturing	★◆0 - Bian-Chenli Ku (Korea Institute of Science and Technology) Multifunctional CNT-Based Composite Fibers	★797 - Siddhesh Raorane (AGH University of Krakow) Multiscale Modeling of Thermal Conductivity in Carbon Nanotube Reinforced Polymer Composites	★◆1650 - Sonia Coca (Institute of Chemistry of Polymeric Materials, Technical University of Lodzm) Sustainable High-Performance Epoxy Thermosets via Polyfunctional Hardeners and Bio-Based Thermo-Latent Catalysts ★◆0485 - Maximilian Grübler (KTAU) On the development of wood plastic composites with reclaimed raw materials employing 3D printing and injection molding	★1691 - Amal Vaipuzhiel (BITS Pilani Hyderabad Campus) Fracture response of 3D printed polyether ether ketone for structural CFRP specimens on uniaxial testing machines	★333 - Ayman Bermen Khalid (Universidad de Castilla-La Mancha) Bond tension-compression Failure for crushed CFRP specimens on uniaxial testing machines	★1171 - Xiyuan Cheng (State UB Center of Aerospace Design and Additive Manufacturing, Northwestern Polytechnical University) Multi-scale, Multi-fidelity Design for High-Performance Flywheel Energy Storage System Multiscale enhancements in 3-pin reinforcement performance through curing parameters
15:00		★716 - Martin Hirwaiem (ENSAS, ONERA, Université Paris-Saclay) Influence of the out-of-plane stress on compressive strength in the fiber direction: application to ply weakness defects and kinked zones	★1745 - Carolina Gutierrez Bal (EPFL) Multi-scale structural analysis of pultruded carbon fiber composites using Small and Angle X-Ray Tensor Tomography	★1072 - Julien Schneider (SARRAN AIRCRAFT ENGINES) Multi-scale Digital Twin of a 3D woven composite technological blade sample	★345 - Melany Hin-Bun (Leibniz Institute of Polymer Research Dresden) Extensional viscosity of polyarylethersulfones (PAEKs) and its composites in material extrusion (MEX) additive manufacturing	ESCM meeting	★1133 - Philipp Marin (Universität der Bundeswehr München) Hybrid CFRP Composites for Cryogenic Environments: Effects of Recycled Carbon Fleece and Additives on Permeability and Damage Resistance		★◆712 - Ogun Kagan Genc (Airbus) Experimental and numerical investigations on the bending and inter-layer shearing behavior of glass fabric rubber composites	★879 - Emanuel Klotho (Federal Institute for Material Research and Testing (BAM)) Treating uncertainties in the failure load prediction of fiber-reinforced composites with acoustic-emission testing	★1183 - Serdar Demir (Boğaziçi University) THE INFLUENCE OF THE OBLIQUENESS OF OPEN-HOLE NOTCHES ON WOVEN FABRIC CARBON/EPOXY COMPOSITES LAMINATES BEHAVIOR
15:15		★434 - Marco Longana (Dipartimento di Chimica, Materiali e Ingegneria Chimica) Comprehensive Characterisation of Biomimetic Hierarchical Composites	★153 - Benedikt Boss (Leibniz-Institute of Composite Materials) Microstructure analysis of micro-X-ray computed tomography scans of staple fiber yarns	★1220 - Mathias Mihalic (kompetenzzentrum Insb GmbH - Wood K plus) Study on chemical foaming in FFF and FGF 3D printing of PHA based blends	★723 - Giulia Fredi (University of Trento) Shape-Stabilized Phase Change Material Nanocomposites with Enhanced Thermal Diffusivity via Aligned Carbon Nanotube Reinforcement	★542 - Jean-Christophe Pellte (Bureau Veritas Marine & Offshore) Fatigue assessment of marine composite propellers			★◆0456 - Tobit Dillmose (Sapmicrotech, Université Marie & Louis Pasteur, CNRS, Institut Femto-st) Remarkably stable damping in GZ-flax-epoxy composites at increasing fiber volume fractions ★◆0454 - Vincent Plasset (Univ-Franche-Comté, CNRS, FEMTO-ST) Natural Fibers for Composites: Limitations and Improvements	★229 - Reza Mhamda (Technical University Of Liesbon) Lifetime Prediction of Discontinuous Fiber Reinforced Polymers	★1051 - Akrik Dargel (Institute of Lightweight Engineering and Polymer Technology, Dresden University of Technology) Combined In-Situ CT and Transient Dynamic Analysis of Fibre-Reinforced Composite Joints at Elevated Temperatures	★◆0481 - Da-Sun Kwak (Department of Mechanical Engineering, Hanbat National University) Study on Lightweight design of an inboard login frame using composite materials ★◆0484 - Chang-Ho Kim (Department of Mechanical Engineering, Hanbat National University, 125) Evaluation of Structural Integrity for Hyperbolic Cylinder Using Composite Materials
15:30		★787 - David Anthony (Imperial College London) Carbon nanotube-grafted carbon fibres and their unidirectional reinforced composites	★200 - Thanasis Chatzidai'anas (Department of Materials Engineering, KU Leuven) Evaluating single-fibre fragmentation and transverse single-fibre tests for interfacial characterisation in composites: advantages and limitations	★772 - Alessandro Vinciguerra (DLR) Towards Virtual Certification of a composite aircraft moveable by means of damage tolerance assessment	★62 - Yannick Schüller (DLR Deutsches Zentrum für Luft- und Raumfahrt e.V.) Improved Interface Strength for Overprinting with CF-LMPAEK	★34 - Rana Farhat (MINES PARIS PSL- P

ECCM22 — THURSDAY (08:00- 18:15) — PRELIMINARY TECHNICAL PROGRAMME (version of 7 June 2026)
◆ = Italic = Short oral (7 min) - plain = Full oral (15 min) - Minor changes to the programme may occur.

Time	Activity	A	B	C	D	Forum	M1	M2	M4	M5	Balder	Odin
08:00-08:30	**PLENARY 4**											
08:45-10:45	**SESSION 1**											
	Session →	**SS02 - Additive manufacturing (3D/4D printing, AFP) for advanced composites**	**SS30 - Variable-Stiffness Composites**	**SS16 - Characterisation of recycled composites**	**SS01 - Delaminations and debonding in composite materials and structures**	**SS27 - Nature-Inspired Composites: From Natural Fibres to Biomimetic Structures**	**7.14 Topology/Design Optimization**	**3.12 Joining and Joints**	**3.4 Durability, Ageing, and Environmental Effects**	**5.17 Welding and Bonding**	**2.6 Nanocomposites**	**6.6 Sensing and Actuation**
	08:45				#352 - Gilles Lubineau (KAUST) Understanding the role of chemical interactions and mechanical interlocking in the adhesion of electrospun coated copper to ABS	#1450 - Carlos Fuentes (Luxembourg Institute of Science and Technology) Enhanced Interfacial Energy Dissipation in Carbon Fiber Composites via Bioinspired Multilayer APTES Deposition using Atmospheric Micro-Plasma	#919 - Inês Gonçalves (Institute of Science and Innovation in Mechanical and Industrial Engineering) Development and implementation of topology optimization techniques for unidirectional composite materials	#496 - Daniel Preston (Centre for Materials) Induction Welding of Vitrimeric Composites	#1692 - Floriane Verzeux (NTNU) Reprocessability of cryogenically aged basalt fiber reinforced polyamide matrix composites used for hydrogen storage in aircrafts	#1558 - Osuke Ishida (Innovative Composite Center, Kanazawa Institute of Technology) Heating process analysis in ultrasonic welding of thermoplastic composites based on dynamic viscoelasticity and vibration phenomena	#86 - Rachid Amrhar (Université de Toulon) Synthesis of a nanocomposite based on recycled epoxidized vegetable oils containing Ag:ZnO nanoparticles for antimicrobial surface protection	#1763 - Yun Xu (Institute of Lightweight Engineering and Polymer Technology (ILK), TUD Dresden University of Technology) 3D MODELLING OF MAGNETIC ALIGNMENT DYNAMICS OF AN INDIVIDUAL FIBRE-LIKE REINFORCING ELEMENT IN MELT-PROCESSED SOFT MAGNETIC COMPOSITES
	09:00				#873 - Joseph Bernaert (Composite Mechanics Group (GR-MeC), Ecole Polytechnique Fédérale de Lausanne - Station 16, Batiment BP.) Detection of Mode II fracture of thin paste adhesive joints	#1222 - Raja Bade (City University of Applied Sciences Bremen) From Biomimetic Core Designs to Circular Composites: PHA-Based Sandwich Structures with Natural Fibre Reinforcements	#91 - Muhammad Uzair (Department of Mechanical Engineering, LUT University) Reliability-Aware Multi-Objective Optimisation of Variable-Stiffness Composite Cylinders with Geometric Imperfections	#1582 - Byeong-Hun Min (Gyeongsang National University) Strength Evaluation and Prediction of Cross-Shaped Composite Joints Reinforced with Multiple I-Fiber Stitching Method	#1105 - Juan Pablo Marquez Cox (PIMM, Arts et Métiers Institute of Technology, CNRS, CNAM) Analysis of the interfacial diffusion coefficient in organic matrix composites based on multi-scale finite element modelling of thermo-oxidation gradients	#876 - Till Krenzoke (benroe GmbH) Examination and demonstration of innovative welding technologies for continuous fiber-reinforced thermoplastic hollow profiles in high-performance applications.	#1024 - Xi Shen (The Hong Kong Polytechnic University) Anisotropic Nanocomposite for Sustainable Solar-Thermal Application	#363 - Karina Dragauskaite (Kaunas University of Technology) Development of Cellulose Nanofibre–MXene Nanopapers as Multifunctional Interlayers for Fibre-Reinforced Plastic Composites
	09:15				#859 - Jean-Baptiste Desbrest (EPFL) Debondable primer for demanufacturing of composite sandwich structures	#439 - Andrea Bercini Martins (Leibniz Institute of Polymer Research Dresden e.V.) BIONSPIRED NANOCLAY GLASS FIBER SIZING FOR INTERPHASE STRUCTURING IN EPOXY RESIN	#197 - Shuya Nozawa (Department of Mechanical Engineering, KU Leuven - Bruges Campus) Eigenfrequency control of composite beams via collaborative topology and fiber orientation optimization	#1364 - Maria Morissa Lu (University of the Philippines Los Banos) Effects of high vacuum SEM on unaged and aged flax fibre/polyester composites	#1699 - Casilda Serrano Villa (WMG, University of Warwick) Effects of polymer molecular weight on the performance of overmoulded parts	#355 - Yiqing Xue (Queen's University Belfast) FUNCTIONALIZED MWCNT/PEI NANOCOMPOSITE FOR ANTI-ICING/DE-ICING APPLICATIONS	#903 - Ruben Windey (Department of Materials Engineering, KU Leuven) Challenges and strategies for particle dispersion and process-induced microstructural design in functional particulate composites
	09:30	#804 - Masahito Ueda (Nihon University) Recycling and tailored printing of carbon fiber composites	#905 - Matteo Iozzi (University of Bordeaux) A Stripe Pattern approach to generate a semi-realistic models of Variable Stiffness Composite laminates obtained through AFP	#268 - Ana Yong (NPL) Unlocking the value of recycled composites through advanced metrology	#336 - Leonardo Guido Sahl (Politecnico di Milano) Modelling delamination initiation and propagation in composite structures using a combined CZM-VCCT approach.	#1283 - Yahya Kara (Functional Polymeric and Particulate Materials Unit, Luxembourg Institute of Science and Technology (LIST), 28 avenue des Hauts-Fourneaux, L-4362) Development of lignocellulosic fiber-based all-cellulose composites	#150 - Matteo Pastrello (University of Ghent) Design Optimization of Thick-Walled Type IV Hydrogen COPVs using an Analytical Framework	#325 - Benedikt Preisz (Universität der Bundeswehr München) Influence of low-velocity impact damage on crack propagation in adhesively bonded thermoplastic composites	#1079 - Elias Bikalis (Shipbuilding Technology Laboratory, School of Naval Architecture and Marine Engineering, National Technical University of Athens) Statistical analysis of the effect of long-term deep-sea exposure on the mechanical properties of filament wound composite materials	#119 - Maria Luisa Puga (University of Twente) Influence of dwell times on structure development and mechanical performance of press-consolidated C/PEKK laminates	#1757 - Mücklim Kaplan (Bartin University) Metal-Free Thermoelectric Nanocomposites: g-C$_3$N$_4$/SWCNT Hybrid Fillers in Recycled Polyamide 6 for Sustainable Waste-Heat Recovery	#776 - Francesco Mongiol (University of Bologna, Department of Industrial Engineering) Self-Sensing CFRP Laminates with Electrospun Barium Titanate Nanofibrous Interleavers for Integrated Structural Health Monitoring
	09:45	#968 - Nanuki Ichihara (The University of Tokyo) Bio-morphologic printing patterns for 3D/4D fiber-reinforced polymer composites	#1030 - Trang Le (Technological University of the Shannon) Effect of Fibre Inclination and Gaps on the Homogenised Stiffness of Variable Angle Tow Composites	#491 - Jianqun Hao (Vrije Universiteit Brussel) Upcycling carbon fibre prepreg scraps by optimizing ply-level joining geometry for high-performance laminates	#637 - Vasco Daniel Castro Pi (Chair of Designing Plastics and Composite Materials, Polymer Engineering and Science, Technical University of Leoben) Automated characterization of delamination onset and growth in multidirectional glass/epoxy laminates	#1388 - Jaime Buitrago Osorio (Luxembourg Institute of Science & Technology - LIST) Bioinspired Intermittent Plasma Deposition of APTES on Carbon and Glass Fibres for Tailored Interfacial Functionalisation	#1015 - Burak Alperen Ihtiyar (ITU) Multimaterial Auxetic Lattice Structures with Optimized Stiffness and Reduced Stress Concentration	#80 - Thals Furon-Faucher (Airbus) Experimental characterization of bearing mechanisms in a carbon/epoxy composite laminate for the modelling of damage in hole-to-hole assembly	#1396 - Valentin Pernuchoud (TU Delft) Understanding the effects of outdoor and accelerated hygrothermal ageing on the monotonic and fatigue performance of flax FRP composites	#382 - Anastasios Vassilopoul (EPFL, Composite Mechanics Group (GR-MeC)) Challenges in the Experimental Characterization of Bulk Structural Adhesives	#5 - Dan Sun (Queen's University Belfast) Synthesising Functional Nanocomposites through "Green" Plasma Chemistry	#369 - Yupeng Shi (KAUST) Wireless Passive LC Sensors for Lifetime Condition Monitoring of Non-Metallic Joints
	10:00	#1247 - Zsolt Kállai (Hamburg University of Technology) From Scan to Part: A Digital Process Chain for Robotic 3D Printing of Fiber-Reinforced Thermoplastics on Curved Thermoset Surfaces	#1418 - Eduardo Menezes (Leibniz Institut für Polymerforschung Dresden e.V.) A NOVEL MANUFACTURING PROCESS FOR COMPLEX-SHAPED COMPOSITE PARTS BASED ON TAILORED FIBER PLACEMENT MADE PREFORMS FROM CONTINUOUS MINERAL FIBER / POLYPROPYLENE AND POLYCARBONATE HYBRID YARNS	#1161 - Johnathan Vargas (Advanced Composites Group, Department of Mechanical and Aerospace Engineering, University of Strathclyde, James Weir Building, 75 Montrose Street, Glasgow, G1 1XJ) Mechanical performance of thermoplastic composites reinforced with thermally recycled glass fibres	#560 - Federica Daghia (Université Paris-Saclay, CentraleSupelec, ENS Paris-Saclay, CNRS, LMPS - Laboratoire de Mécanique Paris-Saclay) Identification of a two-mechanisms cohesive zone law for delamination of architected hybrid joints	#703 - Feifye Esin Yakin (Luxembourg Institute of Science and Technology (LIST), Sustainable Composite Materials & Manufacturing (SCMM) Innovation Centre) Contrasting Durability Mechanisms in Flax Laminates and Bamboo Fiber Composites with MA-g-PP Modification	#682 - Alexandra Krzeminski (DMAS, ONERA, Université Paris-Saclay) Concurrent density- and fiber orientation-based topology optimization of 3D transversely isotropic composite structures with strength constraints	#803 - Yuting Wang (Imperial College London) Quantitative Evaluation of Interfacial Degradation in Hydrothermally Aged CFRP Using Cyclic Push-Out Testing	#607 - Rachel Zammit-Mangion (University of Bath) Statistical Evaluation of Surface Variability on Mode-I Performance of Adhesively Bonded Composite Joints	#279 - Ayumu Morita (Waseda University) The Effect of Processing Conditions and Nanofiller Addition on the Crystallinity and Morphology of Highly Crystalline Thermoplastic Epoxy Resins	#1391 - Yansong Li (University of Warwick) Architectural Decoupling of Mechanical and Thermal Sensing in Dual-Layer Multifunctional Composites
	10:15	#1316 - Julien Deschamps (Univ. Bretagne Sud, UMR CNRS 6027, IRDL) Adaptive by design: 4D-printed metamaterials inspired by marine life	#1307 - Kai Uhlig (Leibniz-Institut für Polymerforschung Dresden e.V.) A NOVEL MANUFACTURING PROCESS FOR COMPLEX-SHAPED COMPOSITE PARTS BASED ON TAILORED FIBER PLACEMENT MADE PREFORMS FROM CONTINUOUS MINERAL FIBER / POLYPROPYLENE AND POLYCARBONATE HYBRID YARNS	#1594 - Masoud Bodaghi (Luxembourg Institute of Science and Technology (LIST), Sustainable Composite Materials & Manufacturing Innovation) Advancing Sustainable Composites: Benchmarking Recyclable ExCelo® Resin Against Acrylate Epoxy Using Robotic GRAM® Wet Filament Winding with Recovered Continuous Carbon Fibres	#989 - Ahmed Wagih (Mechanics of Composites for Energy and Mobility Lab, King Abdullah University of Science and Technology (KAUST)) EFFECT OF PLY THICKNESS ON INTERLAMINAR FRACTURE TOUGHNESS OF THIN-PLY THERMOPLASTIC COMPOSITES	#1132 - Kunal Masania (TU Delft) Three-dimensional printing of functional mycelium biohybrids	#219 - Karthik Ramaswamy (Collins Aerospace - Applied Research & Technology) Multidisciplinary Design Optimization Framework for Composite Structures with Manufacturing Constraints	◆#1573 - *Büşra Topal (Ankara Yıldırım Beyazıt University, Department of Aerospace Engineering)* *The Single Lap Joints (SLJ) with laminated composite adherends under buckling load*	#270 - Guillaume Lebreton (Nantes Université) Thermal oxidation of a disulfide based vitrimer	#899 - Emma Chiavelli (Faculty of Aerospace Engineering, Delft University of Technology) Magnetic Nanoparticles for Self-regulated Magnetic Heating in Thermoplastic Composite Welding	#1342 - Mariam Omar (Sabanci University) From Fiber Coating to Matrix Integration: Enhancing Strength–Toughness Synergy via Dual-Alternant Interphase in CF/Epoxy Composites	#1166 - Theodora Krypanakou (Institute of Lightweight Engineering and Polymer Technology (ILK), TUD Dresden University of Technology) Performance Assessment of Piezoelectric Sensors and Encapsulation Techniques in Composite Structures at Cryogenic Temperatures
	10:30	#660 - Justin Merotte (IRDL/UBS) From Limitation to Function: Toward Localized 4D-Printing Control for Morphing Complex Multi-Material Composite Parts	#55 - Sung Hoon Kang (Korea Advanced Institute of Science and Technology) Bone-inspired Anisotropically self-adaptive composites	#1496 - Gregory Petropoulos (Department of Mechanical Engineering and Aeronautics, University of Patras) Mechanical and interfacial performance of recycled carbon and glass fibres from a novel solvolysis recycling method	#390 - Christina Neeser (Head Sport GmbH) The Impact of Reuse and Remanufacturing on Mechanical Properties of Alpine Skis	#856 - Kyungil Kong (University of Bristol) HIERARCHICAL INTERPHASE DESIGN WITH METAL OXIDE NANOSTRUCTURES ON CARBON FIBRES FOR IMPROVED IMPACT RESISTANCE AND FUNCTIONALITY	#388 - Troy Zangle (University of Maine) Multi-Objective Optimization of Additive-Manufactured High-Speed Small Craft		#212 - Luiza Melo De Lima (Thermoplastic Composites Research Center (TPRC)) Kinetic Modelling of Early-Stage Thermal Degradation in Carbon-Fibre-Reinforced Thermoplastic Composites During Processing	#235 - Hawraa Becher (RT Jules Verne, IREENA) Modelling degradation and healing effect on inductive welding of carbon fiber reinforced composite	#278 - Serge Zhuiykov (Ghent University Global Campus) Ultrathin Ga$_2$In$_2$O$_3$-Ag Plasmonic Composite Membranes for Dual-Mode Photonic and Spectroscopic Detection of Biomolecules	#529 - Fanni Balogh (Budapest University of Technology and Economics) Integration of Multifunctional PCL Layers for Enhanced Performance in Smart Composite Systems
10:45-11:15	**COFFEE BREAK**											
11:15-12:30	**SESSION 2**											
	Session →	**4.2 Data-Driven and Full-Field Methods**	**T3 - Fibre & ductile behaviour**	**SS12 - Long Discontinuous Fibre Composites: Processing, Microstructure, Properties and Performance**	**5.1 2D and 3D Textile Reinforcements and Their Composites**	**T5 - Braided composites & Processing technologies**	**T3 - Multiscale modelling, Hybrid Modelling & Creep**	**7.12 Structural Health Monitoring and Quality Control**	**T7 - Design methods**	**5.17 Welding and Bonding**	**7.11 Recycling, Remanufacturing, and Circular Economy**	**T6 - Functionality & Smart Systems (mixed)**
	11:15	#109 - Francisco Chinesta (PIMM Lab @ ENSAM) Data-driven-based roughness descriptors discovery for tapes surface characterization and optimal consolidation modelling	#499 - Michael Jerabek (Borealis) Damage mechanisms in glass fibre reinforced polypropylene composites	#1232 - Yvonne Aitomäki (RISE) Evaluating the Influence of Forming Process Simulation on the Performance of Recycled Composites for an Electric Vehicle Application	#740 - Yue Zheng Wen (Dresden University of Technology, Institute of Textile Machinery and High Performance Material Technology (ITM)) Improved Flexibility in Robotic Direct Yarn Placement for 3D Textile Reinforcement via Dynamic Height Adjustment of Roving Placement Rack	#1656 - Liva Pupure (Riga Technical University) The affect of temperature on time dependent properties of 3D printed PLA	#577 - Urs Zimmermann (OST Eastern Switzerland University of Applied Sciences / KTH Royal Institute of Technology Stockholm) Synergy between Optical and Embedded Sensor Techniques in Structural Health Monitoring of Composites	#770 - John Finder (Institute of Aircraft Design and Lightweight Structures - TU Braunschweig) A multi-step simulation method using representative volume elements for predicting mechanical properties of recycled composites made from chopped carbon fibre-reinforced thermoplastics	#725 - Israr Ud Din (Brunel Composites Centre, College of Engineering, Design and Physical Sciences, Brunel University London) Finite element modelling of electromagnetic induction welding of carbon fibre reinforced thermoplastics composites	#1433 - *Blanca Purgleitner (Transferzentrum für Kunststofftechnik GmbH)* *Enhancing the mechanical performance of shredded glass fibre composites in epoxy resin bulk moulding compounds* ◆#1224 - *Gustavo Assi (Shaping Matter Lab, Faculty of Aerospace Engineering, Delft University of Technology)* *3D nesting of fragmentable shapes applied to the upcycling of composite sheet manufacturing waste*	**6.6 Sensing and Actuation** ◆#955 - *GeonGyu Lee (Graduate School of Aerospace and Mechanical Engineering, Korea Aerospace University)* *Sustainable N-doped graphene/carbon nanotube composites for electric vehicle battery housings with electromagnetic interference (EMI) shielding and enhanced flame retardancy* ◆#1259 - *Arieth Suarez Hurtado (York University)* *Composite Magnetic Filament Fabrication and Characterization for Magnetically-Assisted FFF Application*
	11:30	#990 - Sai Krishna Yelamarthi (Center for Interdisciplinary Programs, Indian Institute of Technology Hyderabad) Mechanical characterization of carbon fiber-reinforced polymer composites using physics-informed neural networks	#1702 - Leonardo Barcenas (Department of Mechanical & Mechatronics Engineering, University of Waterloo) Mechanical Characterization of Sheet Moulding Compounds: Effects of Strain Gauge Width and Strain Rate	#1439 - Martin Detzel (Leibniz-Institut für Verbundwerkstoffe (IVW) GmbH) Investigation on the Pseudo-Plastic Deformation Behavior of Staple Fiber Organic Sheets	#144 - Serena Tan (NCC) Manufacturing and Characterisation of 3D Woven Composites Developed Using Next-Gen Jacquard-less Loom	#257 - Cassandra Bauer (Fraunhofer IGCV) Influence of Twisting Angle and Braiding Layers on the Bending of Glass Fibre Reinforced Thermoplastic Profiles	#269 - Andrey Aniskevich (University of Latvia, Institute for Mechanics of Materials) Long- and short-term creep of 3D-printed polymer structures	#359 - Sotaro Minami (WASEDA University) Strain and Damage Sensing of CFRP electrically functionalized by Self-Organized Adsorption of Graphene	#938 - Soheil Nasvabi (Durham University) High-Aspect-Ratio Discontinuous Galerkin Finite Elements for Efficient 3D Stress Analysis of Laminated Composites	#1023 - Thomas Hoffmann (Leibniz-Institut für Verbundwerkstoffe GmbH) Simulation-Based Target-Surface-Temperature Control for Continuous Induction Welding of CFRP	◆#1678 - *José Luis Morillo (CATEC)* *Optimization of mechanical properties in fibre-reinforced composite materials made with aeronautic reused uncured prepreg cutoffs* ◆#435 - *Billy Montifar (DLR- German Aerospace Center; Institut of Lightweight Systems; Dept. of Sustainability Technologies)* *Consequences on process parameters upon scaling up the vessel size for solvolysis-based recycling.*	**6.6 Sensing and Actuation** ◆#1629 - *Alexander Delp (TU Dortmund University, Chair of Materials Test Engineering (WPT))* *Mechanical capability of forming-optimized all-cellulose composite vulcanized fiber under wet and dry conditions*
	11:45	#690 - Ali Ghaznavi (Federal Institute for Materials Research and Testing (BAM)) Data driven acoustic emission classification of failure mechanisms in CFRP Tensile Tests	#1041 - Yuki Fujita (Nagoya University) Propagation fracture toughness of injection-moulded short-fibre composites under the combined effects of fibre orientation and tesling temperature	#1564 - Takehiro Shirai (Innovative Composite Center, Kanazawa Institute of Technology) Experimental Evaluation of Fiber-Orientation Anisotropy on Flow and Mechanical Behavior in Discontinuous Long-Carbon Fiber Thermoplastic Composites	#1330 - Leonie Weiblen (Fraunhofer-Institut für Gießerei-, Composite- und Verarbeitungstechnik IGCV) Experimental Evaluation of Fiber-Orientation Anisotropy on Flow and Mechanical Behavior in Discontinuous Long-Carbon Fiber Thermoplastic Composites	#371 - Boris Duchamp (IRT M2P) Adaptive Multi-Axis Braiding of Hybrid Preforms Integrating Functional Fibers for Advanced Composite Structures	#1122 - Faranak Bahrami (Brunel Composites Centre) A predictive multiscale modelling framework to accelerate the development of novel vitrimers and their composites	#651 - Khaled Labidi (Linköping University) Truly integrated sensors for Structural Health Monitoring of Composite Structures in Cryogenic Applications	#210 - Farida Touni (Institute of Polymers and Composites, Hamburg University of Technology) Experimental and Numerical Study of Mantis Shrimp Inspired Thin-Ply Bouligand Composites	#329 - Buse Atac Teksin (University of Sheffield) Introducing a Double-Welding Approach and Investigating the Effect of Welding Time on the Room- and Low-Temperature Performance of Resistance-Welded CF/PEKK Joints	◆#932 - *Somet Ozyigit (LUXEMBOURG INSTITUTE OF SCIENCE AND TECHNOLOGY)* *RECYCLING OF CARBON FIBERS EMPLOYING DEBONDING ON DEMAND APPROACH IN COMPOSITE STRUCTURES* ◆#1351 - *Christina Podara (Research Lab of Advanced, Composites, Nanomaterials and Nanotechnology (R-NanoLab), Materials Science and Engineering Department, School of Chemical Engineering, National Technical University of Athens)* *Sustainable Polypropylene Composites Reinforced with Construction Demolition Wood Waste: Processing, Characterization and Optimization*	**6.6 Sensing and Actuation** ◆#1052 - *Kwan Zhi Teh (School of Metallurgy and Materials, University of Birmingham)* *Effects of laminate ply orientations on fibre disruption in branching vascular network composites* ◆PT9◆#1215 - *Doğan Kaptan (Aerospace Research Center, Istanbul Technical University)* *Next-Generation Strain Sensor in Bonded Glass Fiber Composite Joints for SHM*
	12:00	#585 - Ines Chaouki (Vrije Universiteit Brussel (VUB)) 3D-micro-DIC as a full-field technique for residual strain analysis using incremental hole drilling in additively manufactured nylon composites.	#181 - Michael Wisnom (University of Bristol) Flexural failure of pseudo-ductile carbon / glass hybrid laminates and the interaction between tensile and compressive response	#793 - Demeke Abay Ashebir (Swinburne University of Technology) FFF-Printed Continuous-Fiber Thermoplastic Composites for Lightweight Aerostructures: A Correlation of Process-induced Defects and Mechanical Properties	#177 - Rebecca Emmerich (Institut für Textiltechnik of RWTH Aachen University) Development and evaluation of a method for the one-shot integration of top layers onto lofted nonwoven based core structures (fiber spring-back) for the integral sandwich construction	#1328 - Ellinor Jansson (Chalmers University of Technology) Improving Manufacturability of Structural Battery Composites Using High-Volume Battery Production Practices	#1130 - Tomohiro Yokozeki (The University of Tokyo) Multiphysics Simulation for Predicting Mechanical Properties of Thermoplastic Resins Considering Melding Conditions and Crystalline Imperfections	◆#1258 - *Aldyandra Hami Seno (King Abdullah University of Science and Technology)* *Capacitive IoT Strain Sensing System for Structural Health Monitoring of Non-metallic Pipes* ◆#1032 - *Adele Berends (Technical University of Leoben)* *Comparison of the Mode I and Mode II fracture toughness of glass fiber- and carbon fiber-epoxy laminates and in-depth analysis of the delamination process using acoustic emission analysis*	#1629 - Kinal Kim (Department of Mechanical Engineering, Inha University) Laser-Induced Graphene Metasurfaces with Anisotropic Conductivity for Load-Bearing Broadband Radar Absorbing Structures	#383 - Aya Hosni (Imperial College London) Functionally graded lattices designed by machine learning: considering material orthotropy	#113 - Jesper K. Jørgensen (Technical University of Denmark) Tailoring the Cure Conditions for Thick Glass Fibre Composites for Wind-Turbine Blades	#4487 - Ziyue Wei (Department of Mechanical Engineering, Faculty of Design and Engineering,University of Bath) Enhanced Resistance Welding of Thermoset Composites via Preconsolidated Heating Elements	◆#418 - *Valeria De Fabritiis (Politecnico di Milano)* *Mild, universal and flexible catalyst-assisted solvolysis for circular recycling of fiber reinforced polymers* ◆#362 - *Julio Vidal (Alitlo)* *Recovery and reuse of recycled materials after solvolysis treatments*	**6.6 Sensing and Actuation** ◆#1682 - *Yi Liu (Loughborough University)* *Autonomous Thermal Management in Flexible Conductive Polymer Composites for Wearable Systems and Battery Safety* ◆#1399 - *Valeria Berner (Fraunhofer Institute for Chemical Technology ICT)* *Recyclable, flame retardant epoxy vitrimers based on disulfide bonds and their composites preparation*
	12:15	#159 - Vahid Movahedi-Rad (Wood Materials Science, Institute for Building Materials, ETH Zürich, 8093 Zürich, Switzerland.) Unsupervised–Supervised Classification and Regression Machine Learning (USS-ML) Framework for Predicting Mechanical Properties of Reconstructed Poplar, a High-Performance Fiber-Reinforced Biocomposite		◆#1543 - *Maurice Collins (University of Limerick)* *Impact of Polyamides on Lignin/TPU Blends for Sustainable Carbon Fiber Precursors* ——	#1561 - Peng Xu (School of Mechanical Engineering and Automation, Beihang University) Mechanical property variation after incremental sheet forming of woven fabric reinforced polymer structures	#640 - Jeeun Lee (InnoCORE PRISM-AI Center, Korea Advanced Institute of Science and Technology) Microscale Permeability Prediction of Fibrous Textiles using Finite Basis Physics-Informed Neural Networks and Domain Decomposition	◆#1668 - *Vasileios Anagnostopou (B&T Composites SA)* *Development of a Dual Analytical–Computational Framework for the Design and Modelling of Hybrid Filament-Wound and AFP Carbon Fiber Rollers* ——	◆#661 - Federico Marino (University of Derby) Mechanical and Electrical Characterisation of GnP-reinforced Thermoplastic Elium® Nanocomposites —— ◆#1565 - *Stefano De Luca (University of Parma)* *Preparation of polymer-based composite scaffolds functionalized with titanium dioxide nanoparticles for water remediation.*	#383 - Aya Hosni (Imperial College London) Functionally graded lattices designed by machine learning: considering material orthotropy			◆#357 - *Geunsu Joo (Korea Institute of Materials Science)* *Re-Infusion-Based Repair Process and Structural Integrity Evaluation of Pultruded CFRP Spar Caps with Unimpregnated Interlaminar Defects* —— ◆#1127 - *Defne Deniz Mencelioğlu (Istanbul Technical University)* *Tailoring Composite Laminates for Auxetic Behavior via Particle Swarm Optimization*
	12:30	#667 - Christos Nikolaou (Vrije Universiteit Brussel) High definition thermo-mechanical finite element modelling of fused filament fabrication: validation and comparison with existing simulation tools		◆#1645 - *Vadim V. Silberschmidt (Loughborough University)* *Effect of seawater on performance of composite structures*	◆#1433 - *Yichen Wu (Northwestern Polytechnical University)* *In-situ Curing of FRP Composites via Joule Heating Using Embedded Carbon Nanotubes*	◆#1155 - *Tom Hill (WMG, University of Warwick)* *Implications of Dissimilar Resin Systems and Fibre Architectures on Mechanical Performance of Hybrid Composites*	◆#1667 - *Marcus Welsh (RWTH Aachen)* *Multiscale statistical failure analysis of filament wound unit cells accounting for process induced variation*	◆#1240 - *Christoph Burgstaller (Tckt - Transferzentr für Kunststofftechnik GmbH)* *Large Scale Recycling of Wood-Polymer Composites*	◆#179 - *Maryam Sodagar (Institut für Textiltechnik of RWTH Aachen University)* *Innovative approach for converting untreated bast fibres into engineered UD tapes tailored for multi-axial non-crimp composite manufacturing.*	#1612 - Tommaso Maria Brugo (University of Bologna) Automated Curve-Based Design of ESR Prosthetic Feet Using Evolutionary Algorithms
12:30-13:30	**LUNCH**											
13:30-14:00	**2 KEYNOTES (rooms A & B)**											
14:00-15:30	**SESSION 3**											
	Session →	**SS28 - Intelligent Production Technologies for Load-Dedicated Graded Polymer Composite Structures**		**5516 - Characterisation of recycled composites**	**2.4 Interfaces**	**3.4 Durability, Ageing, and Environmental Effects**	**5.12 Manufacturing of Discontinuous Composites**	**3.12 Joining and Joints**	**2.2 Fibers and Textiles**	**7.7 Environmental Impact, Life Cycle Assessment & 7.13 Sustainbility by design ()**	**2.1 Bio-Derived and Sustainable Composites**	**6.5 Self-Healing**
	14:00	#920 - Esra Yalcinkaya (University of Mons) LIGHT-DRIVEN PNIPAM/GOLD NANOPARTICLE HYDROGEL NANOCOMPOSITES FABRICATED VIA STEREOLITHOGRAPHY FOR BIOMEDICAL APPLICATIONS		#512 - Anna Siebert (Institute of Polymer Materials and Plastics Engineering, Clausthal University of Technology) Re-exploring the Importance of Residual Stresses to the Stress Transfer Capability of the Fibre-Matrix Interface	#759 - Ross F. Minty (University of Strathclyde) Mechanical Recycling of Carbon Fibre-Reinforced Thermoplastics: Effects of Processing Strategies on Structure and Mechanical Performance	#757 - Vincenzo Fiore (University of Palermo) Impact of salt-fog ageing on the recyclability of flax fibre-reinforced bio-composites	#1171 - Shivdarshan Sherugar (University of Bath) Effect of resin infusion on fibre orientation level of aligned discontinuous fibre composites	#666 - Shamala Sambasivam (AIRBUS Operations) Multiscale approach for development of end to end methodology for determination of build stresses in large composite structures	#285 - Delphine Querellhac (Univ. Bretagne Sud, UMR CNRS 6027, IRDL) Improving flax fibres mechanical properties for sustainable composites: direct microstructural rearrangement during chemical bleaching studied with µ-tomography and multiphoton microscopy	#632 - Thomas Neumeyer (Leibniz-Institut für Verbundwerkstoffe GmbH) Life Cycle Assessment of a Geometrically Highly Flexible Lightweight Hydrogen Tank	#691 - Mohamed Amine Belabcen (Université Marie et Louis Pasteur, SUPMICROTECH, CNRS, Institut FEMTO-ST, F-25000) Multi-Scale Assessment of the Stiffness–Damping Trade-Off in Hemp/Elium ® Composites for structural Applications	#708 - Andrea Dorigato (University of Trento) Smart thermoplastic composite laminates with self-healing capability
	14:15	#167 - Sho Bando (The University of Tokyo) Experimental and numerical study on thermal deformation and mechanical properties of 3D printed continuous carbon fiber reinforced composites	#335 - Stephan Rudolph (Professorship Adaptronics and Lightweight Design, Chemnitz University of Technology) Manipulation of fibre orientation using shape memory alloys infibre-reinforced plastics during manufacturing – a feasibility study	#1327 - Marina Corvo Alguacil (Luleå University of Technology) Evaluation of the Effect of Re-Sizing for Recycled Carbon Fiber Using Various Pyrolysis Conditions	#392 - Rami Alawar (LMGC, IMT Mines Alès) COUPLING THERMAL AND INTERFACIAL ANALYSIS FOR A DEEPER UNDERSTANDING OF FIBER–MATRIX ADHESION IN THERMOPLASTIC COMPOSITES	#653 - Alex Frederick Liebau (Fraunhofer Institute for Large Structures in Production Engineering IGP) Investigations into residual load-bearing capacity of damaged and artificially aged flax-fiber-reinforced composites	#256 - Jabran Sarola (The University of Auckland) Enhancing Mechanical Properties Through Reactive In-Situ Plasma-Assisted Extrusion of Glass Fibre-Reinforced Polypropylene/Polyamide-6 Blend Composites	#419 - Julian Steinmetz (TU Braunschweig) Early-stage assessment of bonded composite fuselage joints using a reduced structural model with high-fidelity material modelling	#347 - Alexia Reynet (GEMTEX) Evaluation of the manufacturing of slivers and rovings from recycled carbon fibers	#386 - Paul Domberger (TU Leoben, Processing of Composites and Design for Recycling) Life cycle screening of alpine ski delamination by solvolysis employing supercritical fluids – A novel recycling approach	#991 - Giovanni Filippone (Dipartimento di Ingegneria Civile, dei Materiali e della Produzione Industriale (DICMaPI) - Università di Napoli Federico II) Effect of Processing Pressure on the Interfacial Shear Strength in Hemp/PLA Biocomposites	#591 - Kota Kanauchi (Tokyo University of Science) Self-Healing Mechanisms and Mechanical Property in Polyrotaxane-Modified Epoxy Vitrimers: A Molecular Dynamics Study
	14:30	#738 - Erdem Yildiz (Bristol Composites Institute, Department of Aerospace Engineering, School of Civil, Aerospace, and Design Engineering, University of Bristol) 4D Printing of Fibre-Reinforced Thermoplastics: A Pathway to Intelligent Composite Manufacturing	#699 - Evgenia Madia (Institute of Lightweight Engineering and Polymer Technology, Technische Universität Dresden) Computational workflow for process-structure analysis of thermoplastic braided tape preforms in pressing	#721 - Lorenzo Calevo (POLITECNICO DI MILANO) On the failure mechanisms in discontinuous fiber composites obtained from recycled prepreg scraps.	#410 - Leandra Schmid (Pforzheim University) Investigation of Interface Optimization Methods in Thermoset–Thermoplastic Hybrid Structures	#642 - Anna Kandinskaia (KU Leuven) TIME-DEPENDENCY OF SELF-REINFORCED POLYPROPYLENE AND BIAXIALLY ORIENTED POLYPROPYLENE LAMINATES	#904 - Joana Malheiro (PIEP - Innovation in Polymer Engineering) SMC goes full circle: From characterization and numerical simulation of compression moulding to end of life recycling	#1241 - Riem Killan (Institute of Mechanics and Adaptronics, Technical University of Braunschweig) Enhancing Damage Tolerance in Adhesively Bonded CFRP Leading-Edge Slat through Surface Toughening	#1020 - Indraneel Roy Chowdhur (Aalborg University) Impact of chemical recycling on the surface roughness and sizing retention of carbon fibre reinforcements recovered from recyclamine epoxy composites	#620 - Sabrina Diniz (German Aerospace Center (DLR)) Mind the gap: Improvement of the life cycle inventory for epoxy resins	#599 - Jonas-Rumi Baumann (University of Applied Sciences Bremen) Genotype-Structure-Property Relationships in Fibre Nettle: A Multiscale Study from Fibre-Level Properties to Composite Performance	#77 - Daniele R
