

CONTENTS

J. Bullon, R. Ordás, J. Diéguez: R&D at silicon plant in the last 20 years	
M. Førde Møll, H. Tveit, K. H. Berge: Study of the solidification in a silicon alloy. Cooling rate vs. microstructure	
J. Portal: The use of Rhodax® interparticle. Crusher in silicon industry.....	
M. Brenske, C. Duwe: High Dense Phase Pneumatic Transport of Silicon using MOELLER TURBUFLOW® Technology.....	
S. Bauer: Demand Response – Placing Silicon Furnaces on the Energy-Market	
A. Ulriksen, O. Samset, Ø. Sørli, M. Løkås: Empowering People, a Way to Lower Cost in Silicon Production.....	
J.-P. Mai, G. Raabe, J. Koehler: Experimental and Molecular Simulations Studies of Silicon Production in a Microwave Furnace	
E. Ornelas, E. Segura-Gómez, Merced-Martínez, G. Alvarez-Guzmán, J. A. Gutiérrez-Fuentes, A. F. Aguilera, J. Cervantes: Revisiting the halogenation of silica from rice huks in the route to activate the Si-O bond at low temperatures.....	
M. de Wild – Scholten, Ronny Gløckner: Environmental footprint of Elkem Solar Silicon®	
Won Choon Choi, Woo Hyung Lee, Hee Young Kim, Yong-Ki Park, Joo Hee Han, Gui Ryong Ahn, O-Bong Yang: Catalytic conversion of SiCl₄ to SiHCl₃ for producing poly-Si	
E. H. Myrhaug, H. Tveit, N. E. Kamfjord, G. J. Andersen, Å. Grøvlen: NO_x Emissions from Silicon Production	
C. Hadsbjerg, H. T. Andersen: SCR DeNO_x Catalyst and Technology.....	
K.H. Berget, M. Garcia, H. Tveit: The European emission trading scheme and its impact on the silicon industry in Europe	

G. Humbert, T. Margaria, J. Bullon, A. Miranda: Experiences in boron determination in the silicon metal for TCS and solar applications	
J. P. Svanem, T. Røe, A. P. Ruff, H. Kjønli, B. Eik-Nes, H. M. Rong: Analytical Method to Measure Different Forms of Carbon in Silicon	
J.O. Hoel, G. Andersen, T. Røe, H. Rong: Maximizing trichlorosilane production in the reaction between silicon, silicon tetrachloride and hydrogen	
B. Hazeltine: Advances in Hydrochlorination Technology within a Polysilicon Plant	
R. Jurisch, K. Hanna, L. Coleman: Advances in Impurity Removal for TCS Production	
K. Drumm, C. Griffith, G. Heausler: Reduction of waste in hydrochlorination processes using chlorosilane burners	
S. Beringov, T. Vlasenko, S. Yatsuk, O. Liaskovski, I. Buchovska: Mono-like ingots/wafers made of solar-grade silicon for solar cells Application	
R. Tronstad: A sustainable product for the solar silicon market	
X. Ma, T. Yoshikawa, K. Morita: Solidification refining of Si for solar cells using Si-Sn solvent	
W. O. Filtvedt, H. Klette and A. Holt: Process Optimization in Fluidized Beds for Silicon Production	
E. Øvrelid, Ø. Gjerstad, M. Juel, J.A. Bones, A. Wærnes: Crystal Pulling from Carbon and Nitrogen Saturated Feedstock	
A. Ramos, C. del Cañizo, J. Valdehita, J.C. Zamorano, A. Rodríguez, A. Luque: On track for Solar Grade Silicon through a Siemens process-type laboratory reactor: operating conditions and energy savings	
F. Stary, Gray, nondescript, yet elemental – silicon metal and its strategic relevance for the WACKER Group	
Jørn P. de Linde: Has silicon lost its luster?	

I. Rodriguez, R. Fenollosa, F. Meseguer:	
Light control, an enormous new market for silicon?.....	
J. Carberry:	
A New Approach Using Silicon to Harvest Energy From Waste Heat	
Jörg Acker, Birgit Meinel, Tim Koschwitz, Robert Heinemann:	
The Acidic Etching of Silicon: The Texturization of Solar Wafers to Gain a Low Reflectivity and the Development of the Surface Structure.....	
M. Kambara, T. Yoshida:	
Production of Si nano composite powders for lithium ion batteries by plasma spray PVD.....	
J. Bernreuter:	
The polysilicon market – Perspectives on demand, supply and production technologies	
H. R. Winkelbach:	
Silicone Elastomers – from Innovation to Function.....
