

## NRSN Grand Prix – communicate your science in a fun way!

This year we invite you all to participate in the **NRSN Grand Prix**. The competition consists of 2 rounds and 3 winning places. For the competition you should have a presentation ready of approximately 5 min. The presentation should focus on your project, presented in the way that all your peers could relate.

During the first round you will be presenting your project to your individual group of peers. After each of you has presented, together you will elect one candidate for the NRSN Grand Prix Finale. For the Finale you and your group will work together to expand, improve and perfect the selected presentation to 8 min.

Everyone will vote to select the winners of the NRSN Grand Prix.
