

Unmatched Precision

Velotron® delivers laboratory-grade accuracy and repeatability. Built with RacerMate's signature durability, enjoy the most realistic, science grade training experience on the world's most advanced cycle ergometer.

Velotron is used worldwide by the finest universities, sports science labs, and coaching centers, often in conjunction with our powerful Wingate software. The only bicycle ergometer ever approved for use in the USA Cycling National Talent Search, Velotron is also the ultimate home cycling trainer for those who want only the best money can buy.

Precision Load Generation (5 to 2000 watts)

Countless testing and training applications. Smooth virtual shifting - pedal hard through the gear shift, with no wait or friction.

Radical Flywheel Design (55 pound with free-wheel)

Endless coasting for a true road feel, with a current drive powerful enough to deliver the widest spectrum of load resistance.

Fully Adjustable Frame

Dynafit frame adjustment creates a personal fit for every athlete. Engineered with powder-coated, rust-proof stainless steel.

Powerful software

Ergometer mode and bicycle simulation mode. Displays watts, cadence, heart rate, speed, distance, time and calories. Recode distance, average and peak values.
